Changes in Version 6.3.1 ..................................................................................................................................... 5
Welcome to the OpenOPAC 6.3.1 Installation Guide.

This is for sites who already have OpenOPAC Version 6.3 installed.

**Read the Installation Notes First**

Please carefully read the entire installation guide prior to commencing the actual OpenOPAC release installation.

If you have any questions please log a support call on TOPdesk https://oclc.topdesk.net/tas/public/login/form

If you do not know your TOPdesk login please email support-anz@oclc.org and we will send it to you.

**Serial Numbers**

As you are upgrading you will not need a new serial key, as the program will detect if one was already supplied previously.

**Install OCLC OpenOPAC**

1. Run the installer OCLC.OPEN.FrontendSetup.exe
2. The Installer for OpenOPAC main view will display
3. Select **Click to start installation**. As it is an upgrade the Options should already be configured

4. The installation will run through and the button will change to **Complete** when complete

5. Select **Exit**

6. The OpenOPAC should then be able to be operational with the changes applied

   If you encounter any problems during the installation of Version 6.3.1 please log a support call on TOPdesk. If you do not know your TOPdesk login please email support-anz@oclc.org with details of the problem.

**Changes in Version 6.3.1**

**AMB-1383**: The Mobile version of OpenOPAC shows the same loan status as the Desktop version. The Mobile version had incorrectly shown that loans were overdue

**AMB-1384**: LibraryThing for Free now displays covers. There was a problem in the last release where the covers were not showing even though the Dev key was entered in the parameters. This has now been resolved.

**AMB-1381**: OpenOPAC no longer show that reservations have expired as it appeared to patrons that the reservations were no longer were available, which was not often the case – the expiry date is more for internal use for Staff

**AMB-1382**: The Variable.less is no longer set to read-only during installation
