WELCOME

Welcome to the Amlib DIY/SIP2 5.3.3 Client Patch Installation Guide for the Amlib DIY (Self-Service) Module.

This is a patch release updating the DIY/SIP2 module. The complete installation time is estimated at less than one (1) hour to complete.

Please Note: This document has been prepared for all libraries who currently have Amlib DIY Module Version 5.3 installed.

BEFORE YOU BEGIN THE INSTALLATION...

Read the Installation Notes First

Please carefully read the entire installation guide prior to commencing the actual DIY/SIP2 release update.

If you have any questions please contact: support-amlib@oclc.org.

Please Note: This installation process is for existing Amlib customers who have purchased the optional DIY (Self-Service) Module.

WARNING: Please make sure that the latest version of the Amlib Client is installed and operational on the Self Issues workstation BEFORE installing the Amlib DIY (Self-Service) Module.

Serial Numbers NOT Required for Installation of Amlib Modules

The Amlib DIY/SIP2 Module 5.3.3 Client patch DOES NOT require a serial number.

Frequently Asked Questions

Question: Do all DIY workstations need to be logged out?

• Yes. All DIY Workstations should be completely logged out from all Amlib modules (including DIY) whilst installing the new Amlib module releases UNTIL the entire upgrade processes are completed

Question: Can OCLC (UK) Limited install the upgrade for me?

• Yes. OCLC (UK) Limited can arrange for the onsite installation of this upgrade for a small fee

Please Note: To assist with email support we highly recommend that the default installation folders suggested in the following notes be retained.

For example:

- *Amlib Client software:* C:\Amlib (or D:\Amlib, E:\Amlib)
SECTION 1: UPGRADE AMLIB CLIENT ON DIY WORKSTATION

The *Amlib Client* needs to be updated on the DIY Workstation, and connectivity to the database confirmed **PRIOR** to the installation of the *Amlib DIY Module*.

**Step 1: Log All DIY Workstations out of Amlib Modules**

- Ensure all workstations have been logged out of both the *Amlib* client and the *Amlib DIY Module*

**Step 2: Install the Amlib 5.3.3 Client Patch**

**IMPORTANT:** Please ensure that you have **full read/write** access to the \*Amlib* folder on your PC (for example: *C:\Amlib*) and that you are logged in with **Administrative Privileges**.

1. The *Amlib 5.3.3 Client Patch* installer is available on the OCLC Website, under **Updates and Patches>Amlib Client**:

   (contact *Amlib* support if you require a login to this website)

2. Download the *Amlib533Patch.exe* and save it on your *Amlib* server

3. Double-click the *Amlib533Patch.exe* to launch the installation Wizard – the **Setup – Amlib Client** screen will open displaying the **Welcome** message:

   ![Welcome to the Amlib Client 5.3.3 Patch]

   1. Click the **Next** button – the **Installation Location** window will be displayed

   2. Setup will search for the existing folder where the *Amlib 5.3 Client* is currently installed (if it is unable to find the existing folder a default folder will display)
3. If the folder displayed IS NOT correct then click the **Browse** button to manually locate the location of the existing \Amlib\ folder

4. Click the **Next** button – the Select Components window will display:
5. **Choose** which components should be installed:

   a. **Modules To Install**:
      - **Amlib Staff User (Full)** – upgrades *Amlib* Staff Client (catalogue, circulation, etc.)
      - **Amlib Opac Only** – only upgrades the Amlib Client Server OPAC module (*only select this option if you installing on a Public Access workstation*)

   b. **Report Template Paper Format**:
      - **A4 (Australia, UK, Europe)** – installs the *Amlib* report templates formatted for A4 paper type
      - **Letter (USA, Canada)** – Installs *Amlib* report templates formatted for Letter paper type

6. Select options and click the **Next** button – the **Ready to Install** window will display with a summary of the installation tasks to be performed:

7. Click the **Install** button – the **Installing** window will display:
8. When complete click the **Finish** button

![Image of Completing the Amlib Client Wizard]

9. The setup Wizard will close

Installation of the *Amlib 5.3.3 Client Patch* update is now complete.
SECTION 2: UPGRADE AMLIB DIY (SELF-SERVICE) MODULE

The Amlib DIY Module is installed in the same folder as the Amlib Client, so it is important that the latest version of the Amlib Client be installed **BEFORE** proceeding.

**IMPORTANT:** Please ensure that you have **full read/write** access to the \Amlib folder on your DIY workstation (for example: C:\Amlib) and that you are logged in with Administrative Privileges.

1. The Amlib DIY 5.3.3 Module Patch installer is available on the OCLC Website, under Updates and Patches> DIY:
   (contact Amlib support if you require a login to this website)

2. Download the DIY533Patch.exe and save it on your DIY workstation

3. Double-click the DIY533Patch.exe to launch the installation Wizard – the Setup – Amlib DIY Module screen will open displaying the **Welcome** message:

   ![Welcome to the Amlib DIY Version 5.3.3 patch](image)

4. Click the **Next** button – the **Installation Location** screen will display:
5. Select the folder where the Amlib Client is installed (as in the previous section) – a Default location will automatically display – for example: C:\Amlib

6. Click the Next button – the Select Components window will display:

7. Choose which components should be installed:

   a. Modules To Install:

      - Amlib DIY Upgrade – installs the Amlib DIY program files into the existing Amlib Client folder

8. Select options and click the Next button

9. The Ready to Install screen will display with a summary of the installation tasks to be performed:
10. Click the Install button – the Installing window will display:

11. When complete click the Finish button
12. The setup Wizard will close

Installation of the *Amlib DIY 5.3.3 Module Patch* is now complete.

**SECTION 3: UPGRADE ALL DIY WORKSTATIONS**

Ensure that all DIY Workstations are upgraded using the above instructions.
