Add individual pages of compound objects to sitemap

• Important improvement for content discovery by search engines
• Page-level transcripts and other metadata will be added to the indexes of major search engines
Add IIIF collection manifests

- All image records in CONTENTdm already had IIIF Image and Presentation API responses built in.
- Collection manifest listing every image item will be automatically built.
- Collection of collections manifest also created.
- IIIF Presentation manifest for items contains links back to parent’s collection manifest.
New date search rules

• Single-collection: the first field of type “Date”.
• Multi-collection: all fields have “DC map” as “Date”.

In addition to the above:
• Searchable
• Conforms to date format: yyyy, yyyy-mm, yyyy-mm-dd

What’s coming next

• Searching in compound objects filters out pages without hits. We will make “Show all” the default view, and provide a toggle button to show “Filtered” view.

• Collection selection when searching/browsing is inconsistent. We will fix this and enable a workflow to “refine a search”, etc..

• Collection-level grid view/list view default setting in WCT

• IIIF Presentation manifests for monographs.
