

TeamConnect 5.0.8 Release Notes

This document details the upgrade information, new features, resolved issues, and known issues that are included in TeamConnect 5.0.8. If you are reading this document as a PDF, you can access the most recent version of the [Release Notes](#) in our Client Success Center.

Upgrading to 5.0.8

You must be using one of the following TeamConnect versions in order to upgrade:

- 3.0 SP1
- 3.0 SP1 Update 1
- 3.1
- 3.1 Update 1
- 3.1 SP1, including Update 1 and Update 2
- 3.2, including Update 1 and Update 2
- 3.3, including Update 1 and Update 2
- 3.3 SP1
- 3.3 SP2
- 3.3 SP3, including any update from Update 1 through Update 18
- 3.4, including any update from Update 1 through Update 8
- 3.4 SP1, including any update from Update 1 through Update 20
- 4.0, including any update from Update 1 through Update 14
- 4.1, including 4.1.1
- 4.2, including any update from Update 1 through Update 6
- 5.0, including updates 5.0.1 to 5.0.7

To upgrade to TeamConnect 5.0.8, run the TeamConnect Installer as described in the *TeamConnect Enterprise Installation Guide*.

Important: Users upgrading from 5.0 with a SQL Server database should run the upgrade scripts with the database in **autocommit** mode if their instance contains a large number of line items with adjustment types other than 'NONE'.

Note: These release notes assume that users are upgrading from TeamConnect 4.0.9 or later. If you are upgrading from a TeamConnect version prior to 4.0.9, please see the TeamConnect 4.0.9 Release Notes for information necessary upgrade changes and module dependencies.

Changes and Enhancements

TeamConnect 5.0.8 does not include any net new changes or enhancements. However, users upgrading from versions prior to 5.0.1 are encouraged to read the TeamConnect 5.0.1 Release Notes for changes carried forward from that release.

Upgrade Considerations

TeamConnect 5.0.8 supports both JDK 1.7 and 1.8. Similarly, the 5.0.x line supports WebLogic 11g as well as 12c. Later TeamConnect versions (5.1+) will deprecate JDK 1.7. Users seeking to upgrade to 5.1 from this update will need to upgrade to 5.1.1 rather than 5.1.0.

Resolved Issues

The following issues have been addressed in this update:

- **Issue:** When a TeamConnect instance with SOP was deployed on Weblogic, TeamConnect was unable to connect to Data Warehouse and Office Suite.
Tracking code: SUPPORTPRI-46418
Case Number: 2018-0129-428527
- **Issue:** When task notifications were sent, sometimes the due date in the reminder was a day before the due date shown in the TeamConnect.
Tracking code: SUPPORTPRI-18809
Case number: 2016-0628-259091
- **Issue:** An updateInvoiceSummaryHeader() method has been added to calculate invoice summary values so existing methods retrieve the correct values.
Tracking code: SUPPORTPRI-45543
Case number: 2019-0104-498538
- **Issue:** The groupMemberList.group qualifier in validation rules was not triggering actions.
Tracking code: SUPPORTPRI-46039
Case number: 2019-0129-503498
- **Issue:** If a validation rule had an "Update" trigger on a custom object and used "CurrentObject.detaillist.category is changed" as a qualifier, the qualifier would not be evaluated properly and the validation rule would not take effect.
Tracking code: SUPPORTPRI-46404
- **Issue:** In a validation rule with left and right arguments, the right argument of a condition in the rule qualifier was not being exported through CTU.

Tracking code: SUPPORTPRI-46675

Case number: 2019-0215-507765

- **Issue:** When a user exports a Portal Pane and then imports it into another environment, an invalid value error for objectTypeID was returned.
Tracking code: SUPPORTPRI-38502
Case number: 2018-0509-449969
- **Issue:** If the timezone settings in a TeamConnect user's preferences and on their machine were earlier than GMT, the Start Dates and Due Dates in the email notifications for newly created tasks differed from the values in TeamConnect.
Tracking code: SUPPORTPRI-33226
- **Issue:** When a user navigated to an object after creating a search view that used the involved party custom field, a fatal error was returned.
Tracking code: SUPPORTPRI-46971
Case number: 2019-0225-509888

The following issues had been addressed in updates to earlier versions of TeamConnect and are also included in this update:

- **Issue:** TeamConnect was passing a time stamp when saving tasks through the Outlook add-in causing the time and/or date to be incorrect.
Tracking code: SUPPORTPRI-45577
Case number: 2018-1116-490798
- **Issue:** When users clicked the **Edit Cost Center Mapping** button, the page would refresh and would not allow users to edit cost center allocations.
Tracking code: SUPPORTPRI-34548
Case number: 2017-1212-420208
- **Issue:** CTU tool was incorrectly importing phase transitions for rules configured on 'Phase Change'.
Tracking code: SUPPORTPRI-35702
Case number: 2018-0206-430514
- **Issue:** Invoice approvals using Outlook 2016 in HTML format were causing an exception.
Tracking code: SUPPORTPRI-44961
Case number: 2017-1205-418042
- **Issue:** Custom search filters that included a custom child object were returning more results than appropriate.
Tracking code: SUPPORTPRI-31025
Case number: 2017-0731-388474

- **Issue:** Copying a document in TeamConnect did not retain the security set on that document.
Tracking code: SUPPORTPRI-31287
Case number: 2017-0821-393040
- **Issue:** When **Assign Again** was used for expired or rejected invoices and a user searched for the invoices using the Current Approver workflow, the search did not return any approvers in the list.
Tracking code: SUPPORTPRI-31779
Case number: 2017-0907-396788
- **Issue:** In the **Email** folder of the **Documents** tab, users did not have the option to view all results and could not bypass the search limit based on records per page selected.
Tracking code: SUPPORTPRI-33894
Case number: 2017-1114-413360
- **Issue:** Resolved an issue with rule implementation through a template.
Tracking code: SUPPORTPRI-34937
Case number: 2018-0110-424749
- **Issue:** Searching for Custom Objects while setting up a Template returned no results.
Tracking code: SUPPORTPRI-35199
Case number: 2018-0117-426103, 2018-0119-426671
- **Issue:** An optimistic lock was encountered when trying to upgrade from 2.1.0 to 2.1.2 and using DMT to install Office Suite.
Tracking code: SUPPORTPRI-35425
Case number: 2018-0112-425435
- **Issue:** Images within .eml signature did not render when viewed in TeamConnect.
Tracking code: SUPPORTPRI-35849
Case number: 2018-0214-432166
- **Issue:** "Search In Folder" criteria was causing a secondary folder to be created and set as a default folder.
Tracking code: SUPPORTPRI-36305
Case number: 2018-0215-43258
- **Issue:** ElasticSearch was indexing Primary Keys which could be searched in Global Search.
Tracking code: SUPPORTPRI-36997
Case number: 2018-0228-435222
- **Issue:** File extensions were not being uploaded properly to TeamConnect through the add-in.
Tracking code: SUPPORTPRI-38373
Case number: 2018-0320-439604
- **Issue:** Documents that had a capitalized file extension were having an incorrect file extension created in the database when being uploaded.

Tracking code: SUPPORTPRI-38394

Case number: 2018-0503-448908

- **Issue:** Filtering the search criteria via the drop down in the search bar was missing functionality.
Tracking code: SUPPORTPRI-40473
Case number: 2017-0913-398106
- **Issue:** Creating a report with the “Constant” field placed at the top of the report would cause the report to fail when ran.
Tracking code: SUPPORTPRI-41791
Case number: 2017-0915-399037
- **Issue:** System User no longer appeared in WH_USER table after a fresh install or a refresh.
Tracking code: SUPPORTPRI-44074
Case number: 2018-1015-483199
- **Issue:** If an invoice was previously restarted by a user who is currently inactive, other users were not allowed to restart the invoice.
Tracking code: SUPPORTPRI-45202
Case number: 2018-1119-491113
- **Issue:** Resolved an issue with custom searches not working as intended when running in Apache Tomcat 8.5.
Tracking code: SUPPORTPRI-45382
Case number: 2018-0221-433611
- **Issue:** Search using custom java code generated the wrong SQL query.
Tracking code: SUPPORTPRI-46755
Case number: 2019-0131-504281
- **Issue:** When running a Custom Search with the "**Not Equal to**" operator on a custom field of an Embedded Object, records without Embedded Object records were not returned in the results.
Tracking code: SUPPORTPRI-38262
- **Issue:** Address display searches were returning with java strings instead of normal address display search results.
Tracking code: SUPPORTPRI-41290
- **Issue:** Searching a multi-value list for ‘Has Value’ and ‘Has no Value’ was returning errors.
Tracking code: SUPPORTPRI-41313
- **Issue:** Having a multi-value list as a ‘Results Display’ in a search was returning a system error.
Tracking code: SUPPORTPRI-41435

- **Issue:** Allegation searches were returning with java strings instead of normal allegation search results.
Tracking code: SUPPORTPRI-41470
- **Issue:** Elasticsearch recurring job was not picked up by other nodes.
Tracking code: SUPPORTPRI-44215
- **Issue:** Recurring indexing did not resume if failed Elasticsearch nodes were restarted.
Tracking code: SUPPORTPRI-46052
- **Issue:** Newly created records are not returned in Global Search because the background thread took 2 minutes to start after manual indexing.
Tracking code: SUPPORTPRI-46540
- **Issue:** The CTU was not importing Tool rights correctly.
Tracking code: SUPPORTPRI-42721
Case number: 2018-0815-470889
- **Issue:** Scheduled Actions were not automatically resuming after a restart.
Tracking code: SUPPORTPRI-42788
Case number: 2018-0905-475186
- **Issue:** The API was not allowing users to have both Update and Delete rights.
Tracking code: SUPPORTPRI-42993
Case number: 2018-0910-476016
- **Issue:** The Cache-Control max-age header was not adding the number together.
Tracking code: SUPPORTPRI-43172
Case number: 2018-0910-476035
- **Issue:** There was not an API implementation for retrieval of the line item adjustment reason.
Tracking code: SUPPORTPRI-43700
Case number: 2018-0912-476460
- **Issue:** Changes to contacts while **Duplicate Contact Manager** is enabled was leading to a large amount of errors in log files.
Tracking code: SUPPORTPRI-44350
Case number: 2018-1108-488979
- **Issue:** Line Item Adjustment Methods via the Enterprise API were not working properly.
Tracking code: SUPPORTPRI-44121
Case number: 2018-0912-476460
- **Issue:** A Legacy TeamConnect exception was being encountered when trying to copy and delete folders and files.

Tracking code: SUPPORTPRI-40213

Case number: 2018-0607-456391

- **Issue:** Dates were shifting on a custom contact field due to a JVM conversion issue.

Tracking code: SUPPORTPRI-31967

Case number: 2017-0921-400089

- **Issue:** CTU did not capture all field deletions.

Tracking code: SUPPORTPRI-33355

Case number: 2017-1012-405128

- **Issue:** Pre-population rules did not migrate properly when using the CTU tool.

Tracking code: SUPPORTPRI-38861

Case number: 2018-0313-437970

- **Issue:** Non-US Taxes were displaying on the Invoice Summary Block instead of the Tax Summary block.

Tracking code: SUPPORTPRI-39672

Case number: 2018-0214-432248
