

## Voyager 9.1 Release Resolved Issues

Ex Libris Confidential

This Excel file contains a list of all the issues that were resolved for the Voyager 9.1 release November 2014.

See the **List of Resolved Issues** worksheet.

### General documentation for this release:

<http://www.customercenter.exlibrisgroup.com>

Ex Libris Confidential

Summary	Release Notes Comments	Component/s	Key
Some orders appear on the Open Order Report when they should not	Added functionality to acqjob 2 to check for multiple invoices, and report Invoice Item Status as "Invoice Pending+" if any are pending. Also fixes VYG-5762 and VYG-1436.	Acqjob	VYG-4654
Incorrect Invoice Item Status displayed for line items in Open Orders report	Fixed by VYG-4654, as it is a different manifestation of the same defect.	Acqjob	VYG-5762
ACQ: able to create a new component and check in on a completed PO	Add the PO_STATUS to the data returned by the GSUBLINEPO (GetSubLinePO) API, which is called when the Search or Next button is clicked on the Subscription Maintenance dialog. The PO_STATUS will allow the correct enabling of any of the editing features on the Subscription Maintenance dialog.	Acquisitions	VYG-4141
acq:unable to change begin/end date of a fund	The begin and end dates of the fund are checked when the fund is saved and any change made to them, if valid, is now saved.	Acquisitions	VYG-4220

Ex Libris Confidential			
Summary	Release Notes Comments	Component/s	Key
ACQ:can't limit access to ledgers in different acq security profiles	<p>Fixed the ledger navigation functionality to be consistent with the ledger/fund search functionality.</p> <p>This means that only those ledgers which are valid for the given location, and are also valid for the locations in the operator's acq security profile will appear in the ledger/fund navigation tree. If a ledger has a location that is not part of the operator's security profile, then that ledger will not be part of the ledger navigation tree.</p> <p>This fix applies every place where the ledger navigation tree appears in the acq client.</p>	Acquisitions	VYG-4448
ACQ:changes made to fund data in Extended Fund Allocation using the Remove/Add Fund are not saved	This issue cannot be replicated in 9.1.0. The Ledgers and funds displayed are the correct ones.	Acquisitions	VYG-4451
ACQ:overcommit/expend blocks have incorrect values	Fixed the code that displays the allocation increase amount.	Acquisitions	VYG-4495
ACQ: Price does not appear on line items for PO created with Bulk import	Populate the line item count and subtotal for the associated PO. Update bulkimport to put scale (6 decimal point) in the line item funds percentage entry for the line item due to the change of feature allocate fund by fixed amount.	Acquisitions	VYG-4597

Ex Libris Confidential			
Summary	Release Notes Comments	Component/s	Key
ACQ:overcommit warning + override and approve option not working	The APPPO API now returns the expected response when the approval of a PO will surpass the Overcommit Warning % value set for a fund, but does not exceed the Overcommit Limit %. The Acquisitions client now has the information it needs to present the warning message and enable the Override and Approve button. Clicking the Override and Approve button calls the APPPO API again, this time with flags set to override the warning, and so the PO is approved.	Acquisitions	VYG-4717
ACQ : Run-time error 5 when creating new vendor addresses	If the vendor phone number is missing when "Save" is clicked, the user will be asked to provide one and will be placed into the phone number view; the run-time error will not occur.	Acquisitions	VYG-4810
Adding a new item does not generate a ranked hold.	Works correctly in 9.1.	Acquisitions, Cataloging, Circulation	VYG-4841
ACQ:operator w/o permissions can override overcommits through Edit Approved	Permissions must be checked to enable/disable the Override button.	Acquisitions	VYG-4873
WebV/Acq: Inconsistent display of next expected issue	OPAC uses same logic as Acquisitions to determine the next expected issue.	Acquisitions, WebVoyage	VYG-4893
ACQ:can't set component default item type to blank (to pull from SA setting)	The user may now reset a default item type to blank in the component and the software will then use the item type for the intended location from the Acq Policy.	Acquisitions	VYG-5203

Ex Libris Confidential			
Summary	Release Notes Comments	Component/s	Key
ACQ: Users are able to unreceive line items on completed Purchase Orders	Once a purchase order has been completed, the operator is no longer able to "Unreceive" a copy.	Acquisitions	VYG-5306
EOD: Multiple copies created, but only one item record	Do not allow editing of the "Number of copies per line item" when creating a bulkimport profile that entails POs and multiple MFHDs/Items. Each item created will have a copy line item created.	Acquisitions, Bulk Import, Cataloging	VYG-5640
ACQ: "Receive items" for EDI not recorded in database	Fixed the code to accurately reflect the state of the 'Receive Items' flag in search and 'Receive a file' results.	Acquisitions	VYG-5754
ACQ: "Received Issue: ...previously marked or claimed."	Calling the correct API fixes this issue.	Acquisitions	VYG-5756
ACQ: wrong fund displays and saving can result in data corruption	Disable interaction in the client until all the information has finished loading.	Acquisitions	VYG-5809
ACQ: line item remains in list after add to invoice	Restored code that refreshes the display.	Acquisitions	VYG-5960
CIRC/CAT: Manually add/remove item status, statistical categories clears modify operator, location	Ensure operator id and logged in location are included in the item status and statistical category updates to item records.	Acquisitions, Cataloging, Circulation	VYG-6018
ANA: Error when adding new Event Transactions query subjects to reports.	Packaging error in 9.0 - fixed in 9.1.	Analyzer	VYG-5887

Ex Libris Confidential			
Summary	Release Notes Comments	Component/s	Key
Batchcat does not return the expected error code 41	No date was being sent to the server and therefore no validation ever took place. If the update date (i.e., most recent action date in the history tables) received by batchcat does not match the most recent update date in the database, the update is rejected with an error code 41.	Batchcat	VYG-5824
BULK: Import stops when call number error	Increase the temporary buffer size to hold the call number when creating field 852.	Bulk Import	VYG-2513
bulkimport:mfhd not creating with long 852	Fixed by the fix to VYG-2513.	Bulk Import, Cataloging	VYG-4369
BULK: Non-Unicode records containing Greek characters fail to load.	If the MARC8 characters are combined as with an accent and a Greek character, then do not do an error check on the first character processed.	Bulk Import, Cataloging	VYG-4599
852 Indicator 1 does not set for MFHD's created using Multiple MFHD Bulk Import Profiles.	Use the correct call number hierarchy ID to retrieve the call number type.	Bulk Import, System Administration	VYG-4996
WebAdmin: BulkImport log file not always attached to email	Changed output message in cases where uuencode was not installed.	Bulk Import, WebAdmin	VYG-5045
BULK: Blanks in Orders tab result in import failure	Allow NULL options for optional bulkimport PO order tab field (e.g. note, instruction type, and vendor reference number).	Bulk Import	VYG-5101
CAT/BULK: 1-character RDA carrier crashes	Allow bulkimport to continue if the software encounters an RDA index failure.	Bulk Import, Cataloging	VYG-5153

Ex Libris Confidential			
Summary	Release Notes Comments	Component/s	Key
BULK: Wrong call number pulled with multiple hierarchies	Use the correct call hierarchy number ID to retrieve the call number.	Bulk Import	VYG-5301
BULK: PID mismatch on log file	Display parent process ID in the bulk import log file.	Bulk Import, WebAdmin	VYG-5425
Bulk Import ignores cutter subfield when the sub-fields for call number and cutter Number are not adjacent	Allow cutter not to follow immediately after call number subfield in imported file.	Bulk Import	VYG-5724
BULK: Multiple bulk imports allowed regardless of -M	The check for multiple processes and whether the -M switch is being used needed to be outside the check for the -M option.	Bulk Import	VYG-5763
BULK: Multiple MFHD rule cannot match 10-char fund code	Fixed code so that allocated space for fund code matches actual size of fund code data, especially when retrieving code from MARC record field. Then make sure to retrieve (up to) all 10 characters from the MARC field.	Bulk Import	VYG-5850
BULK: Update existing MFHDs not matching for multiple copies	Allow a user to update previously uploaded Purchase Order MFHDs as long as the number of locations and items match.	Bulk Import	VYG-5854
Bulk Imports from WebAdmin result in incorrectly named log files	Fixed by VYG-5425.	Bulk Import, WebAdmin	VYG-5945
CallSlip:requests writing to the call_slip table with -1 as patron_db_id value	Update the patron_db_id column from -1 to 0 for the tables call_slip and call_slip_archive for local call slip request.	Callslip	VYG-4211
cat: resequence item records gives "item not found" msg but then resequences	This is working correctly in 9.1.0.	Cataloging	VYG-4239

Ex Libris Confidential			
Summary	Release Notes Comments	Component/s	Key
CAT: Name/Title Validation using title nonfiling chars on name	When validating a Bib Heading for Name/Title searching, do not apply the non-filing indicator to the normalized heading.	Cataloging	VYG-4299
SysAdmin: 'Use Templated Forms' inactive in Cat Profiles	"Use Templated Forms" is specific to Citation Server. It is correct for this to be unavailable in SysAdmin for non-citation databases.	Cataloging, System Administration	VYG-4572
Staff subject subdivision index search fails when subdivision types filter applied	Added the single quotes around subdivision types to stop the query from failing to execute.	Cataloging	VYG-4986
WebVoyage includes "." and "-" for sort of subject headings	Sort the heading table results by the normalized heading.	Cataloging, WebVoyage	VYG-5530
CAT: Records printed from cataloging word wrap incorrectly when Windows display size is larger	Tweaked grid settings and resizing so no text is lost.	Cataloging	VYG-5627
CAT: ELINK_INDEX not updated for case changes	Get the elink_id from the existing database record so that the row updater will have it and use it for the elink_index update.  Do not ignore case when comparing an updated link to a saved link in elink_index	Cataloging, Circulation	VYG-5815
CALL browse with multiple words opens index after search string	Added an optional wildchar indicator to the normalization routine to retrieve the correct results.	Cataloging, OPAC	VYG-5924
Barcode display in Cataloging hierarchy is limited to 14 characters	Barcode column width adjusted to accommodate the max barcode length of 30 characters.	Cataloging	VYG-6050

Ex Libris Confidential			
Summary	Release Notes Comments	Component/s	Key
CAT: Quebec misspelled	Fixed typographical error: Qubec -> Quebec	Cataloging	VYG-6132
CATJOB: Unauthorized headings report, trouble with long headings	Works correctly in 9.1.	Catjob	VYG-4586
GHC:CATJOB 11:Data in tables not removed when name title auth deleted	Works correctly in 9.1.	Catjob, Global Headings Change	VYG-4762
Cirjob 44 expires all patron barcode statuses	Only expire an active barcode for patrons that meet the patron group and expiration criteria.	Circjob	VYG-5123
CIRC/UB/CLUSTERS:patron not retrieved when barcode is entered in request window	Works correctly in 9.1.	Circulation	VYG-4607
CIRC: Patron note field character limit not apparent when adding note	Limit notes edit field to maximum length of the note field in the database.	Circulation	VYG-4634
CIRC: Duplicate Patron gives RTE 381	Corrected some array boundaries checking in the client.	Circulation	VYG-5087
CIRC: Items Available don't show when Pickup Location longer	Fixed code that resizes the columns.	Circulation	VYG-5753
Voyager 9.0 clients crash on Windows servers	Changed method of allocating memory that doesn't offend Windows Server.	Client	VYG-5758
CAT/WebV: Owing Library doesn't display for Call Number browse	The logic to validate the incoming locations from the result set has been corrected to allow for a successful retrieval of the owning library.	Cataloging, Database, OPAC, WebVoyage	VYG-4852
DOC: WebVoyage documentation for Tomcat does not include PSR	The updated documentation will be reflected in the Voyager 9.1 release of the WebVoyage Architecture Overview and Configuration Models guide.	Documentation, Patron Self Registration	VYG-4618

Ex Libris Confidential			
Summary	Release Notes Comments	Component/s	Key
Circjob 44 does not change operator ID	Use -i to pass the operator id in circjob 44.	Circjob, Documentation	VYG-5130
GDC: unable to sort record result list using all sort types in Sort By feature	Added pass through vacs adapter for SORT_RESET API. Confirmed search results now sortable.	GDC	VYG-5132
GDC: Data change fails with "Does Not Equal" condition	Allow referencing of variables declared in the condition, and handle wildcard indicators for "equals" and "does not equal" rules.	GDC	VYG-5144
GDC Deletes All 007 Fields if Any 007 Field Matches Delete Rule	Added multiple occurrence support to control fields.	GDC	VYG-5202
GDC: Indicator values must both use or not use wildcard	Allow indicators with wildcard and value in a "contains" condition.	GDC	VYG-5463
GDC: fixed fields must have placeholders to update correct field position	When an 006 field is added via GDC, it will be padded to full fixed length with blank characters.	GDC	VYG-5808
GDC: Some strings with Boolean operators not matched	Rules no longer need an AND between conditions. This prevents the text substitution that caused some string replacements to fail. Existing rules that were originally saved with AND between conditions are updated.	GDC	VYG-5822
Primo extract does not extract titles of media items when discharged.	The media scheduler needed to update the item status table when an item becomes charged or not charged so that Primo extract can get updated records.	Media Scheduling, Primo Extract	VYG-5893
MS: End time during noon hour with multiple bookings gives incorrect block	Use 24-hour time in time calculations for multiple bookings.	Media Scheduling	VYG-6138
MS/Circ: Overdue status is applied every time Mediajob creates an overdue notice	Insert new item overdue status if it does not exist. Otherwise update the date.	Mediajob	VYG-5889

Ex Libris Confidential			
Summary	Release Notes Comments	Component/s	Key
Sort By and Limit Search options disappear after Sort By is used.	Modified logic in the SearchResultsAction class to only set the 'nextPage' to callNumberPage if the indexCode is 'U' and the search is a browse.	OPAC	VYG-4433
WEBV:media equipment form shows in tomcat even if can't request	Check media request availability when doing generic patron requests (no bib) through WebVoyage.	OPAC	VYG-4531
webv:Multiple limits and remove post search filter option not available	The "remove filter" option displays for quick limits with multiple limits.	OPAC	VYG-4587
WebV: "Select All" check box appears multiple times for UB patrons with items from multiple databases	Moved code outside loop so we only generate a single "select all". Since we only need a single renew XML fragment, that is fixed as well.	OPAC	VYG-4601
WebV: Pickup locations do not use OPAC Display Name	Pickup locations in Tomcat WebVoyage request forms will now default to the OPAC display name if set in Sysadmin. Pickup locations will revert to location name if the OPAC display name is not set.	OPAC	VYG-4609
WebVoyage put quotation marks around "From:" address	Add a {mail.from} property to webvoyage.properties. If it exists, use that value as the "From:" address for email we send. If it does not exist, continue to construct an address the same way we have been.	OPAC	VYG-4615
OPAC Search Log table has incorrect Client Type entries	Corrected a problem that caused overwriting the search string buffer and put incorrect data in the client type buffer.	OPAC	VYG-4757

Ex Libris Confidential			
Summary	Release Notes Comments	Component/s	Key
WebV: Circ Block Codes are not all defined in pageProperties.xml	Added missing block codes so that generic block message can be replaced with user configurable message.	OPAC	VYG-4769
WebV: mail.subject value doesn't affect subject line of email	The code responsible for building form was not looking at the webvoyage.properties value for mail.subject. Created a method to first check and use the value set in the webvoyage.properties. If not set, then use the old logic.	OPAC	VYG-4783
TKEY Searches ending in punctuation preceded by a space fail in Tomcat Webvoyage	Check for and remove punctuation when it is a term that is at the end of all of the search terms.	OPAC	VYG-4962
WEBV: "BookbagMessage1" displays instead of message set in webvoyage.properties	Fixed server code to use consistent capitalization so that messageCode matches webvoyage.properties key. Added functionality to MyListPage to check for messageCode and if present, get text from webvoyage.properties.	OPAC, WebVoyage	VYG-5542
WebV: PG blocks don't display in MyAccount if no display name	Use patron group name when patron group display name is null.	OPAC, System Administration, WebVoyage	VYG-5641
WebV: Advanced search ignores additional search arguments if first argument contains a boolean word	Treat Boolean operators AND, OR, NOT included in the search argument as any other search argument.	OPAC	VYG-5891
WEBV: oldest issues display in descending order	Use the latest issues in descending order.	OPAC	VYG-5918
VPRIMO: Multi-threaded extract throws exception	Fixed code that generates extract summary.	Primo Extract	VYG-5574

Ex Libris Confidential			
Summary	Release Notes Comments	Component/s	Key
Voy/Primo: Location information not extracted when multiple 852 fields	Only use the first 852 subfield b as the location to build the availability record for Primo extract.	Primo Extract, Primo Integration	VYG-5599
Common fields in NoticeEmail.cfg are not modifying email content	Fixed by VYG-4896.	Reporter	VYG-5213
DPS: Preservation extract not checking EXISTS_IN_DPS flag	Works correctly in 9.1.0.	Rosetta Extract	VYG-5538
SELF:Renews result in discharged items for changed patron groups and blocks	Selfcheck functionality now matches Circulation client functionality in the scenario described in this issue.	Selfcheck	VYG-5299
SMS Proxy missing parameters for Simplewire / openmarket.com	New package fixed the problem.	SMS Gateway	VYG-5500
SysAdmin: circ policy definition: copied policies do not save changes	Allow copying to existing Circulation policy matrix if the user selects to override the warning.	System Administration	VYG-4195
SysAd:can't edit exception date w/ old calendar after changing to current	Ensure that the "Exception Date" field is not flagged as read-only during editing of an existing exception.	System Administration	VYG-4208
Sys Admin crashes when backspacing AM/PM in Circulation calendars	Disable use of the Backspace key in the Open Time and Close Time fields by substituting "cursor left". The operator can still type over any existing data or use the cursor up/down keys to change the AM/PM setting.	System Administration	VYG-5326
Unable to renew UB items	Optional UB indication parameter for renew XML over HTTP API is passed to renew a UB item not at the patron's home.	Universal Borrowing	VYG-5949
WEBV: Item status does not display for simulsearch and UC	Works correctly in 9.1.0.	Universal Borrowing, Universal Catalog, WebVoyage	VYG-5475

Ex Libris Confidential			
Summary	Release Notes Comments	Component/s	Key
Primo extract from voyager generates logging errors	Logging configuration changed.	Primo Extract, Various	VYG-4635
WebV: Duplicate renewals via OPAC	Remove duplicate item parameters from vwebv.	VXWS, WebVoyage	VYG-5460
WebV: Re-sort keeps previous sort order for recurring records when print/email	Changed the way bib ids are stored and used in conjunction with the search results and print/email so that records are printed in the order in which they were selected.	WebVoyage	VYG-5883
API: Patron XML help text needs updated URL	Help text has been updated to no longer point to EL Commons.	XML Patron Update	VYG-5958
Z39.50 only binds to one IP address/hostname in Voyager 9	Updated a configuration file.	Z39.50	VYG-5730
Incoming Z3950 connection shows 0.0.0.0 source IP address.	Use a new method to get the host IP address that complies with the IPV4/IPV6 standards.	Z39.50	VYG-5858
