

# Server Access for Ex Libris Support

August 2015

## CONFIDENTIAL INFORMATION

The information herein is the property of Ex Libris Ltd. or its affiliates and any misuse or abuse will result in economic loss. DO NOT COPY UNLESS YOU HAVE BEEN GIVEN SPECIFIC WRITTEN AUTHORIZATION FROM EX LIBRIS LTD.

This document is provided for limited and restricted purposes in accordance with a binding contract with Ex Libris Ltd. or an affiliate. The information herein includes trade secrets and is confidential.

## DISCLAIMER

The information in this document will be subject to periodic change and updating. Please confirm that you have the most current documentation. There are no warranties of any kind, express or implied, provided in this documentation, other than those expressly agreed upon in the applicable Ex Libris contract. This information is provided AS IS. Unless otherwise agreed, Ex Libris shall not be liable for any damages for use of this document, including, without limitation, consequential, punitive, indirect or direct damages.

Any references in this document to third-party material (including third-party Web sites) are provided for convenience only and do not in any manner serve as an endorsement of that third-party material or those Web sites. The third-party materials are not part of the materials for this Ex Libris product and Ex Libris has no liability for such materials.

## TRADEMARKS

"Ex Libris," the Ex Libris bridge, Primo, Aleph, Alephino, Voyager, SFX, MetaLib, Verde, DigiTool, Preservation, URM, ENCompass, Endeavor eZConnect, WebVoyage, Citation Server, LinkFinder and LinkFinder Plus, and other marks are trademarks or registered trademarks of Ex Libris Ltd. or its affiliates.

The absence of a name or logo in this list does not constitute a waiver of any and all intellectual property rights that Ex Libris Ltd. or its affiliates have established in any of its products, features, or service names or logos.

Trademarks of various third-party products, which may include the following, are referenced in this documentation. Ex Libris does not claim any rights in these trademarks. Use of these marks does not imply endorsement by Ex Libris of these third-party products, or endorsement by these third parties of Ex Libris products.

Oracle is a registered trademark of Oracle Corporation.

UNIX is a registered trademark in the United States and other countries, licensed exclusively through X/Open Company Ltd.

## Supported Connection Options

These are the several different levels of access that you can grant to Ex Libris so that Ex Libris can support and upgrade your server. The level of access you grant can affect Ex Libris' ability to support your server, especially during emergency situations. This list is in increasing level of restriction of access. If your site's security policies preclude any of these options, contact Ex Libris Support.

### Total Global Access

Secure Shell (SSH) is available; all ports are open to the world.

---

**Note:** This option is convenient but does not meet modern security standards.

---

### Unlimited Access Through a Firewall

SSH, file transfer protocol (FTP), and software ports are open to Ex Libris IP addresses.

---

**Note:** This option is the best compromise between security and usability.

---

### Unlimited Access via SSH Port Forwarding

SSH is available to Ex Libris IP addresses; all other ports can be forwarded via the SSH protocol.

### Access via VPN

Ex Libris is given an account and access to connect to the your site's Virtual Private Network (VPN).

---

**Note:** This option may limit some troubleshooting ability and efficiency.

---

## Limited Access Through a Firewall

SSH, FTP, and software ports are open to Ex Libris IP addresses when specifically requested.

---

**Note:** This option may delay emergency work until your local IT can grant access.

---

## Desktop Sharing Protocol (Windows Only)

Remote Desktop Protocol (RDP) or Virtual Network Computing (VNC) connection is available to Ex Libris IP addresses.

---

**Note:** Either RDP or VNC is required to support Windows servers. These connections can be allowed through a firewall, as above.

---

## Duplicated System

Ex Libris has access to clone(s) of the production server(s) where changes or troubleshooting happen. The customer then moves upgrades, patches, fixes, and so forth to a secure server without assistance from Ex Libris.

---

**Note:** This option makes emergency support impossible and delays regular support.

---

## Ex Libris IP Addresses

While many customers primarily receive support for a particular product from one office, Ex Libris may sometimes need to assign employees from another office to provide the best or most timely support. Allow access to as many of the following IP addresses as possible:

### Jerusalem, Israel

212.179.71.70

212.179.71.34

### Chicago, USA

192.80.206.206

## **Boston, USA**

12.21.149.130

## **US Hosting Center**

65.197.230.\*

## **Australia**

203.87.118.110

## **France**

195.5.253.245

## **Germany**

217.91.56.60  
195.37.97.145  
194.8.220.178

## **United Kingdom**

88.96.11.121

## **Italy**

77.43.110.210

## **Ports**

Ex Libris Support primarily needs SSH access to customer servers, but opening other ports to Ex Libris IP addresses helps Support troubleshoot more effectively. Check with the Support

team for each of your Ex Libris products to confirm the specific ports used by that product. The standard ports regardless of product include:

20	FTP data (outbound)
21	FTP control (outbound)
22	SSH
80	Web / Default OPAC
1521	Oracle Listener
3389	RDP (Windows servers)
5900	VNC (Windows servers)

### **Voyager**

Each Voyager database has a port series, such as 70xx, where each client connects on a specific port in that 1000-port range. Below is the basic default port scheme; your server may vary. Check /etc/services on your server and C:/Voyager/voyager.ini on your PC for specifics.

7000 OPAC Server

7010 Cataloging

7020 Acquisitions

7030 Circulation

7031 Standard Interface Protocol

7040 Reporter

7050 System Administration

7060 Keyword

7070 File/Abstracts

7080 Call Slip

7081 Scandoc

7085 Media Scheduling

7090 Z39.50

### **Other Ex Libris Software**

9299 Analyzer

22009 Meridian

# Passwords

In order to provide application and server support, Ex Libris needs a record of the passwords for each of the following users (if they exist on your system). If you are unable to provide these via eService or a phone call to the support line, Support is limited in its ability to troubleshoot and may be unable to make fixes.

## UNIX

root (or equivalent, for example, sudo)  
oracle  
exlibris  
voyager  
cognos

## Windows

Administrator  
voyager

## Clients

SYSADMIN  
Other Operators (as needed)

## Administrative Interfaces

Any appropriate accounts (as needed).
