Cataloging Network – Upcoming

• Integration with national central catalogues:
  • The French collective catalogue (SUDOC)
  • Italian union catalogue of periodicals (ACNP)
  • Danish union catalogue (DANBIB)
Acquisitions Network

Network Zone

© 2017 Ex Libris | Confidential & Proprietary
• Alma Based Consortia
  • Improved Management of Shared Electronic Resources
  • Provide ability for staff to see a ‘combined’ view of IZ and Shared (NZ) resources
• Complex Deals
  • Central office can today negotiate a deal with vendors in a License of type ‘Negotiation’
  • Negotiation details include:
    • Members for which the resource was negotiated for
    Member can be Alma and Non-Alma members
    • Price per member
    • Subscription period per member
  ➢ If the negotiated content is different for each member it will be possible to indicate which inventory was negotiated for each member
Resource Sharing Network

Alma and non-Alma partners

External broker
Resource Sharing Network – Upcoming

• Extended Workflow Options
  • Status Query and Report sending
  • Conditional Reply
  • Overdue message for NCIP P2P (via email)
  • Lost & Damaged

• Display item requestability and loans availability in Primo
  • For NZ members, the resource sharing request form will indicate whether there are potential suppliers with the NZ before the request is submitted.

• Protocols
  • Support for ISO 18626 – the new ISO ILL protocol
Resource Sharing Network – Upcoming

• Locate process enhancements
  • Borrower side locate profiles will use electronic coverage information to improve locate results for electronic articles
  • Lender side will use electronic coverage information to accurately match on locally held electronic articles
  • Self ownership checks will make use of coverage information when determining self ownership

• Broker Integrations
  • Push borrowing requests to Relais
  • Tighter integration with Rapid
Next phase of the Fulfillment network

- Focuses on automating the process. As part of this enhancement of the fulfillment network, patrons are able to request a resource without selecting the lender. The system will do this selection based on their request attributes, and will promote the request to the next lender if the selected one is not able to fulfill the request.

- Requests not fulfilled within the consortia will go on to become resource sharing requests for fulfilling outside of the consortia.
• Consortia level blocks and Limits
  • It will be possible to run the fulfillment network so that selected blocks imposed by one institution will also block patron privileges in other institutions, as defined by consortia policies.
  • In addition, it will be possible to impose consortia wide limits, so that a patron may be defined with limitations that are consortia level (loan limits, owed cash limits)
Fulfillment Network – In Process

• Centralized user management
  • Consortia that can manage patrons in a centrally managed file will be able to do so based on a NZ managed file. This will make cross consortia patron information simple to manage and always up to date.
Fulfillment Network - Upcoming

• Support for cross consortia unique item barcodes as part of the fulfillment network workflow
  • No need for the operator to identify the owner of the item before scan in
  • the system will automatically identify the owner of the item based on its barcode.
• Enhanced IZ view of Shared NZ Resources
  • E Inventory Subject Area
  • IZ member logged into Analytics, will have the ability to report on resources managed on the network that are available for them
Central Management of:
• Display Logic Rules
• Item Description templates
• Locate Profiles (Improved)
Administration Network – Upcoming

Central Management of:
• General Electronic Services
• Integration Profiles
• Publishing Profile Templates
• Fulfillment Units
• SFTP Definitions
• Linked Account Rules
• Role Profiles
