

Issue Type	Component/s	Summary	Documentation Required	Changed Files	Key	SF Case
Task	General - Infrastructure	<p>Before the upgrade from Solr 6.6.5 to 7.5.0, planned for the SFX March 2019 Release, it is necessary to run a Solr 'complete build' in the SFX environment.</p> <p>By default, Solr index building in SFX is set to be 'incremental'. This hotfix will force a Solr complete build to be run the next time the Solr index build is scheduled on the SFX server (typically Solr indexing is scheduled at night or during a time of less heavy SFX usage). You can use SFX task manager or ServerAdmin Utility to check when the Solr index build is scheduled in your SFX environment.</p> <p>Because of this forced 'complete' build, the Solr index build will take longer the first time after this hotfix has been applied. SFX services will not be down during this index build, but server performance may be less than usual.</p>		config/force_actions.config admin/aztools/solr_index_builder.pl lib/Solr/IndexBuilder.pm	SFX-7742	
Defect	Front End - SFX Menu	<p>Fix problem with the 'Message no full text target' showing up in case there is a full text target. This issue was caused by the automatic priority setting for platforms supporting direct links introduced during the December 2018 Release. This problem has been fixed.</p>		lib/SFXMenu/Services/DisplayLoginc.pm	SFX-7743
