

Coverage of MLA data in Summon Index

As of December 2018, the following list provides additional information about the Modern Language Association (MLA) International Bibliography database and the coverage of its content by alternative collections in the Summon Index.

The list contains those collections that contribute to the coverage of the MLA content in Summon. Collections marked with (*) are available for activation to users from subscribing institutions only. All other collections are automatically searchable by summon customers, with any collections you subscribe to displaying in the search results by default, and all other collections appearing when the user selects “Add results beyond your library’s collection.”

Note that coverage is measured at the title level (title, ISBN, ISSN).

The total coverage of MLA content stands on 96.7%.
