

Appendix: CSL Citation Style List

RefWorks support the following 1,968 CSL styles.

CSL – [Citation Style Language \(CSL\)](#) is a crowd-sourced repository of over 8,000 commonly used citation styles. This is in addition to the thousands of RefWorks citation and bibliography styles you may have created using the RefWorks Citation Style Editor, CSL styles are also available for use in RefWorks.

- CSL styles are identified throughout RefWorks with a green CSL icon and a lock.
- CSL Styles can be selected for use like any other citation style in RefWorks. If footnotes or endnotes are not supported by the CSL style, it will be noted when the style is selected.
- Because CSL styles are created and maintained by the CSL community, any editing or modifying of these styles is done outside of RefWorks in the [CSL visual editor](#).

To see other RefWorks citation styles, check out the [Appendix: RefWorks Citation Styles](#)
