

What's New In Procore

Here's what we've been up to from July 2019 - September 2019

FEATURED UPDATES

NEW PRODUCT

Procore BIM

Allow entire project teams to confidently 'fly the model' and compare field conditions to 3D models and 2D drawings. Using the Models tool within the Procore iOS app, effortlessly navigate and view reliable BIM data—helping reduce installation errors and increase productivity. [Learn more.](#)

PROJECT MANAGEMENT

Smart photos

Leverage machine learning to find and organize data faster and more efficiently—reducing data entry for the field and increasing data quality for the admins. [Learn more.](#)

Punch List Dashboard

Your Punch List is the last impression you leave on a project. Get insight into the performance of your Punch List with the new Punch List Dashboard to quickly spot potential for risk and drill into reports to take action immediately. [Learn more.](#)

DESIGN COORDINATION

Track activity & collaborate in real-time with coordination hub

Empower project teams to take action, increase communication, and leverage the collective mind with new commenting and @mention functionality via a centralized activity feed. [Learn more.](#)

FIELD PRODUCTIVITY

Simplify payroll

Make life easier for your payroll teams. Pre-formatted payroll exports for Quickbooks Desktop make it faster and easier to import data from the Timesheets tool into your payroll system. [Learn more.](#)

QUALITY & SAFETY

Get greater insight into your jobsite incidents

Capture environmental and property damage incidents within the Incidents tool so you can track and report everything in one place for greater insight.

[Learn more \(1\), \(2\)](#)

Easily document witness statements

Capture the details of anyone that is a witness to a jobsite incident, in a reportable manner, regardless of being in the Procore Directory or not. [Learn more.](#)

Easily add impacted personnel on incidents

Add personnel to your project within the Incidents tool with witness statements or affected persons, without adding them to your directory. [Learn more.](#)

FINANCIAL MANAGEMENT

Import Sage 300 tax groups

Import specific Sage 300 CRE tax groups into Procore to apply multiple rates on a single line item and eliminate double entry. [Learn more.](#)

What's New In Procore

Here's what we've been up to from July 2019 - September 2019

OTHER UPDATES & ENHANCEMENTS

New: Announcements tool on mobile

Improve communication between Procore administrators and users from directly within the Procore mobile app. Procore administrators now have the ability to send any type of message to a person or group of people.

[Learn more.](#)

Extract Procore data with fewer clicks

With the new Procore Extracts app, you can extract items from all project tools at once directly to your Windows computer. This application is an updated experience that aims to more accurately display progress updates and provide better control of the items you want to extract.

[Learn more.](#)

Configurable fields for Directory & RFI tools

Configurable fields within the Directory and RFI tools are now available so you can capture the data that matters to your team. This capability allows for better control over data entry when users create and edit items within these tools. [Learn more.](#)

Project level tool configuration

Configure multiple fields within certain Procore tools to optional, required, or hidden and assign these configurations to different projects. This allows you to create specific fieldsets that meet the needs of individual projects or different business units within your company. [Learn more.](#)

Additions & updates to the App Marketplace

Our newest integrations include: Procore Imports, Onware Sync, QR Inventory, GoalCheck.In, EcoDomus, iConstruct Clash, Power Tools, Frameworks ERP Integration, Sage 100 Contractor Timesheets Integrator, HoloLive/MobiLive by VisualLive, and MYOB with OneCore.
