

# What's New In Procore

Here's what we've been up to from October 2019 - December 2019

## FEATURED UPDATES

### Classification on Timesheets

Employee's Timesheet hours can now be allocated to the appropriate work classification, ensuring labor hours are accurately tagged to the correct level of labor. [Learn more.](#)

### Individual time entry

Employees can now log their own time in Procore. Give your workforce the ability to clock in and out from a mobile device and always know if they are onsite or offsite with GPS tagging. [Learn more.](#)

## QUALITY & SAFETY

### Add attachments to forms & fillable forms on web

Reduce the amount of time your office teams spend looking for paperwork with the ability to fill out Forms on the web, right inside of Procore (previously only available on mobile). In addition, you can now add supporting attachments like photos, drawings, and other documents to these forms. [Learn more.](#)

### Improved inspection scheduling

You can now schedule inspections and receive email notifications for overdue items. [Learn more.](#)

### Improve safety with better incidents reporting

Select multiple body parts when reporting on an incident, resulting in more granular detail capture and the insights you need to keep related incidents from happening in the future. [Learn more.](#)

## PROJECT MANAGEMENT

### Daily Log accountability

Decide what's most important to you with custom fields on the Manpower Log. The bigger the job the more detail you can capture or keep it simple for smaller specialty contractors. Track information specific to your project or company. [Learn more.](#)

### Submittals

Implement an automated process for adjusting the submittal workflow dates to keep your project on time and on track. With 'Admin' level permissions, add the 'Dynamic Approver Due Date' setting to eliminate the need to manually update each approver's due date. [Learn more.](#)

## FINANCIAL MANAGEMENT

### Viewpoint Vista synced budget modifications

Export Procore Budget Modifications to Viewpoint Vista to alleviate double entry. Users now have the ability to include both updated original estimate amounts and Procore Budget Modifications. [Learn more.](#)

### Unified Line Item Experience

The Unified Line Item Experience Release provides one, streamlined and intuitive line item creation process across Project Financials tools creating consistency and usability. [Learn more.](#)

# What's New In Procore

Here's what we've been up to from October 2019 - December 2019

## PLATFORM

### Embedded experience

We've made it easier than ever to create, locate, install, and manage construction apps designed to meet unique construction challenges.

[Learn more.](#)
