

# Procore + GoFormz

Capture better job site data. Dispatch forms pre-populated with Procore data. Improve data quality.

With GoFormz, easily digitize your existing forms for use on phones, tablets, and computers – or build brand new digital forms from scratch.

### REAL-TIME DATA

Completed forms and data are instantly synced with Procore, streamlining workflows and improving job site transparency.

### CAPTURE DATA ANYWHERE

Use the GoFormz mobile app to capture images, signatures, gps, and more – both on and offline.

### CENTRALIZE DOCUMENTATION

Dynamically route completed forms and data to corresponding Procore records and the Documents tool.

### DISPATCH PRE-FILLED FORMS

Mobile forms pre-populated with Procore data can be instantaneously dispatched to teams in the field.

Integration Map

Form completed at job site
Project Approval & Creation
Time & Materials Tracking
Budget Modifications
Toolbox Talks

Completed form dynamically routed to the appropriate Procore record. A PDF of the completed form is instantly uploaded to the Documents tool.
Automatically provision projects in Procore after routing through an approval workflow. GoFormz can automatically apply project templates, add users to the user directory, and apply user permission templates.
Create change events and change orders in Procore once T&M forms are approved. Procore budgeted rates can be used to auto-calculate labor and materials price.
Provide a customizable approval workflow for budget modifications and sync Procore budget line items to GoFormz forms. Approved modifications are automatically saved as Procore budget modifications.
Use mobile forms to keep track of toolbox talk topics and attendees. Easily select users from the Procore project user directory.

Integration Map

Pre-Task Plans

Track and document task steps, task hazards, equipment needed, get sign-off signatures, and dynamically create required permit forms.

Daily Construction Reports

Utilize a single form to automatically save manpower and equipment log data to the daily logs of multiple Procore accounts simultaneously. Replicate form data to SQL Server automatically.
