

Using Snapshots to Create Observations

Objective

Using the Snapshot tool with Procore

Background

Hangar's JobSight offers a full digital archive of your project, before, during and after construction. Autonomous drone capture, gives you every perspective, drones can do more than just map.

Things To Consider

- User Permissions
 - When you connect your JobSight Project to Procore your Project will not be private. Anyone with the link will need a procore login to view your Jobsight.

Steps

1. Navigate to your JobSight Project
2. Locate the issue you want to log, and select the snapshot button at the bottom right of the JobSight interface.

3. Once you have taken a snapshot, a dialog will appear for you to input information about this image. You will be able to select the check box titled ' Create Procore Observarion.' Once you select this, you will be prompted to input a name, description, and input all required fields for creating an observation in procore.

Create Snapshot

Capture date: 7/27/17
Snapshot created: 10/18/18
Created by: Robert Hull

Name
Invalid snapshot name.
