

What's New in Procore?

Here's what we've been up to from July 2018 - September 2018

Featured Updates

RECOVER PROCORE COSTS WITH EXPENSE ALLOCATION

The expense allocation tool provides a statement of cost allocation so you can bill your Procore technology costs to the project owners. [Learn more.](#)

ACCELERATE OWNER INVOICE APPROVALS

You now have the flexibility to bill your change orders in line with your schedule of values. You can also group your owner payment application by cost code, division, cost type, and subjob. [Learn more.](#)

PROTECT YOUR PROFITS WITH GENERAL CONDITIONS MONITORING

Easily track budget line items that pose the greatest financial risk to your projects. General Conditions Monitoring empowers Project Managers to forecast and scenario test their non-commitment costs so they can take proactive steps to avoid profit erosion. [Learn more.](#)

MANAGE DRAWINGS BY AREA FOR OFFLINE USE ON MOBILE

You can now download drawings by Area onto your mobile device (iOS & Android) to save storage, data usage, and time spent syncing. When you're done with an Area of the project, just remove the drawings from your mobile device. [Learn more.](#)

ORDER DRAWING VERSIONS BY DATE

Your drawing versions will automatically be ordered by date with the most current version at the top. This makes it easier and faster to upload drawings into Procore. [Learn more.](#)

IMPROVE DAILY LOG COMPLIANCE AND COMPLETION

The new "Daily Log Completion Report" has been added to the library of Quality & Safety Dashboards. This shows a consolidated report of your project's daily log to see which days have been completed and by whom. [Learn more.](#)

Project Management Updates & New Releases

BETTER PLANROOM EXPERIENCE FOR BIDDERS

We have overhauled the Planroom Tool for a more intuitive user experience and added new bid sheet features. [Learn more.](#)

ENHANCED SUBMITTAL REPORTING

Report on an individual's submittal review and response times when multiple approver and ball-in-court assignees exist. [Learn more.](#)

EASILY LOCATE SUBMITTALS & RFIs BY SUBJOB

You can now link and manage submittals and RFIs by subjobs. [Learn more.](#)

SUBMITTAL EMAIL NOTIFICATIONS PREFERENCES

Manage who, when, and how often submittal notifications are sent to everyone on the project team. [Learn more.](#)

Project Management Updates & New Releases, continued

ORDER DRAWING VERSIONS BY DATE

Your drawing versions will automatically be ordered by date with the most current version at the top. This makes it easier and faster to upload drawings into Procore. [Learn more.](#)

MANAGE DRAWINGS BY AREA FOR OFFLINE USE ON MOBILE

You can now download drawings by Area onto your mobile device (iOS & Android) to save storage, data usage, and time spent syncing. When you're done with an Area of the project, just remove the drawings from your mobile device. [Learn more.](#)

IMPROVE DAILY LOG COMPLIANCE AND COMPLETION

The new "Daily Log Completion Report" has been added to the library of Quality & Safety Dashboards. This shows a consolidated report of your project's daily log to see which days have been completed and by whom. [Learn more.](#)

Quality & Safety Updates & New Releases

AUTOSAVE PHOTOS TO YOUR DAILY LOG

Now photos uploaded to the Photos Tool can be directly added to a photos log within the Daily Log Tool (added photos appear on web, mobile, and PDF exports). [Learn more.](#)

IMPROVE DAILY LOG COMPLIANCE AND COMPLETION

The new "Daily Log Completion Report" has been added to the library of Quality & Safety Dashboards. This shows a consolidated report of your project's daily log to see which days have been completed and by whom. [Learn more.](#)

EDIT OBSERVATIONS WITH FEWER CLICKS

Edit multiple Observations at the same time, offering a superior experience to anyone maintaining the log of Observations. [Learn more.](#)

MANAGE OBSERVATION TYPES MORE EASILY

Mark Observation types as "Active" or "Inactive" at both the company and project levels. This streamlines the field user experience while enabling your company to maintain consistency in collecting the data you find valuable. [Learn more \(1\), \(2\)](#)

INCREASED FUNCTIONALITY ON WINDOWS MOBILE APP

- Added the Inspections Tool. Users can now perform and edit inspections
- Added the Forms tool. Users can now view completed forms
- Now supports RFID tag reading and writing as well as QR Code reading

[Learn more.](#)

Construction Financials Updates & New Releases

GREATER CONTROL OVER YOUR BUDGET

You can now unlock your Budget without losing any budget modifications, allowing you to add and/or update original budget amounts throughout the course of a project. This provides the flexibility to manage phased work. [Learn more.](#)

NEW CONFIGURABLE COST CODE STRUCTURES TO FIT YOUR BUSINESS NEEDS

The Budget Tool now supports the newest CSI Masterformat and CSC Masterformat with the latest multi-level Procore standard budget view. The new budget view supports the ability to group and filter cost codes by up to 5 levels. [Learn more.](#)

ACCELERATE OWNER INVOICE APPROVALS

You now have the flexibility to bill your change orders in line with your schedule of values as well as group your owner payment application by cost code, division, cost type, and subjob. [Learn more.](#)

PROTECT YOUR PROFITS WITH GENERAL CONDITIONS MONITORING

Easily track budget line items that pose the greatest financial risk to your projects. General Conditions Monitoring empowers Project Managers to forecast and scenario test their non-commitment costs so they can take proactive steps to avoid profit erosion. [Learn more.](#)

PAY YOUR SUBS FASTER AND MITIGATE OVERBILLING

Subcontractors are now able to itemize their schedule of values in Procore so you can have more detail and transparency to determine the true cost of work completed and approve each billing period quicker. [Learn more.](#)

Field Productivity Updates & New Releases

PUBLIC API

With our public API, you can now pull time data from any third party solution, sync it with Procore Labor Tracking for full productivity analysis, and push it to your trusted payroll solution. [Support Article](#)

FIELD PRODUCTION REPORTS

The Field Production Report empowers field and office teams to make decisions based on real time labor and production data. Track production rates in real time by cost code and empower field teams with data. Available on mobile and web. [Support Article](#)

Other Updates & Enhancements

CAPTURE PHOTOS FASTER ON MOBILE

This enhancement makes it much simpler and reliable for your field teams to take, save, and access daily photos. [Learn more \(1\), \(2\).](#)

IMPORT NEW CONTACTS IN MINUTES

Company level 'Admins' can now easily import contacts directly into Procore with the simple imports tool. Contacts can be employees, project team members, or other business entities, such as subcontractors or vendors. Currently only available on Procore's Windows 10 app. [Learn more.](#)

ALL YOUR PROCORE INTEGRATIONS IN ONE PLACES

The new App Management Feature allows you to view and manage all your company's integrations with Procore in one place. [Learn more.](#)

RECOVER PROCORE COSTS WITH EXPENSE ALLOCATION

The expense allocation tool provides a statement of cost allocation so you can bill your Procore technology costs to the project owners. [Learn more.](#)

ADDITIONS & UPDATES TO THE APP MARKETPLACE

Our newest integrations include: Dropbox by BuildrSync, Trestles Labor Management System, Lienwaiver.io, Bluebeam with BuildrSync, Brickschain Handover, Xero with Dimensions by Calance, ManufactOn, ProjectionControls.online, and ShapeDo.

Updates have been made to the following integrations: StructionSite and Hagar Jobsite.
