

# What's New In Procore?

Here's what we've been up to from January 2019 - March 2019:

---

## Featured Updates:

### MANAGE YOUR PROJECT TASKS IN THE FIELD ON MOBILE - iOS & ANDROID

Managing tasks is a major part of jobsite operations. You can now quickly create & review project tasks on the fly from your mobile device. Learn more: [iOS](#), [Android](#).

### CAPTURE INCIDENTS IN THE FIELD IN REAL TIME - iOS & ANDROID

The incidents tool is now available on mobile so you can capture and manage incidents more accurately without having to walk back to the office or jobsite trailer. Learn more: [iOS](#), [Android](#).

### EXPEDITE WEEKLY TIMESHEET SIGNATURES ON MOBILE - iOS & ANDROID

With weekly signatures, your employees can sign off on all their hours across all jobs for the week with one signature. Learn more: [iOS](#), [Android](#).

## Project Management Updates & New Releases

### ORGANIZE RFIs BY PROJECT PHASE

Procore has updated the Project level RFIs tool so you can create a predefined list of prefixes to help you better organize your project's collection of RFIs by project stage. [Learn more.](#)

### EASILY CORRECT THE ORIENTATION OF DRAWINGS

You can now rotate drawings that aren't in the correct orientation while in "review" status. [Learn more.](#)

### SPEND LESS TIME SEARCHING FOR DRAWINGS ON WEB

You can now find drawings in a project by typing keywords in the search bar. This provides you with a list of drawings that have occurrences of these keywords. [Learn more.](#)

### FASTER PUNCH LIST CLOSEOUT

This new punch list workflow simplifies collaboration between project teams (Owner, GC, Architect, and Subs) and adds more accountability and transparency into the punch list process. [Learn more.](#)

## Quality & Safety Updates & New Releases

### CAPTURE INCIDENTS IN THE FIELD IN REAL TIME - iOS & ANDROID

The incidents tool is now available on mobile so you can capture and manage incidents more accurately without having to walk back to the office or jobsite trailer. Learn more: [iOS](#), [Android](#).

### STANDARDIZE YOUR OBSERVATION FIELDSETS

You can now configure your Observations to better fit your business needs. Make fields optional, required, or hide them completely—streamlining the process for your field teams. [Learn more.](#)

## Field Productivity Updates & New Releases

### EXPEDITE TIMESHEET SIGNATURES ON MOBILE - iOS & ANDROID

With weekly signatures, your employees can sign off on all their hours, across jobs for the week with one signature. Learn more: [iOS](#), [Android](#).

### GAIN VISIBILITY INTO EMPLOYEE'S HOURS FOR THE WEEK - iOS & ANDROID

Weekly view of Timesheets gives crew leads insight into an employee's total hours for the week across projects. This makes it easier to see when an employee is approaching or has crossed the overtime threshold. Learn more: [iOS](#), [Android](#).

### SIMPLIFY THE TIMESHEET APPROVAL PROCESS

Reduce the amount of administrative work required for payroll. The new company level Timesheets tool allows you to view, edit, and approve all time for the week across jobs. [Learn more.](#)

## Other Updates & Enhancements

### MANAGE YOUR PROJECT TASKS IN THE FIELD ON MOBILE - iOS & ANDROID

Managing tasks is a major part of jobsite operations. You can now quickly create & review project tasks on the fly from your mobile device. Learn more: [iOS](#), [Android](#).
