

What's New In Procore

Here's what we've been up to from April 2019 - June 2019

FEATURED UPDATES

PROJECT MANAGEMENT

Daily log calendar view

Quickly view daily log completion and the status of entries one month at a time. This eliminates the hassle of navigating between different dates to verify whether they have been filled out and marked as complete. [Learn more.](#)

PROJECT MANAGEMENT

Search across all drawings

Find exactly what you are looking for on a drawing by entering keywords or phrases in the search bar. Search specific terms like 'bike rack' to see every location it appears on a drawing. Or, search for more general terms like 'electrical panel' in order to see the total count on a specific drawing. [Learn more.](#)

FINANCIALS

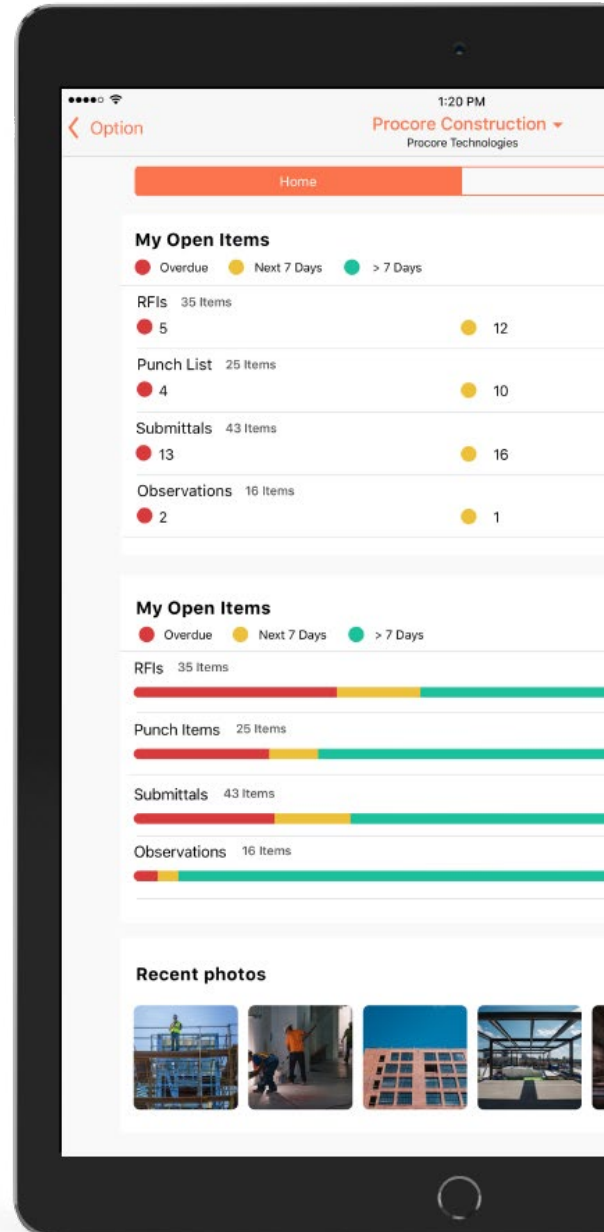

Eliminate double entry to streamline accounts payable

Procore Invoice Management is now integrated with Quickbooks Desktop, enabling project teams to streamline their invoicing process and pay their subs faster. [Learn more.](#)

PROJECT MANAGEMENT

Document tagging

Easily locate files of certain categories or types from a single location. Instead of needing to navigate back and forth between different folders or create duplicate files to exist in multiple folders, you can now create tags to help categorize project documents. [Learn more.](#)

What's New In Procore

Here's what we've been up to from April 2019 - June 2019

QUALITY & SAFETY

Additional response types within inspections

With the addition of text, numerical, and date responses within the Inspections tool, you can achieve a higher level of control, flexibility and reporting across your checklists.

[Learn more.](#)

Observations environmental category

Open up your safety program to include capturing environmental observations. This new category will help you keep them separate from your other Observation types for reporting purposes. [Learn more.](#)

DESIGN COORDINATION

Reduce rework with 3D to 2D coordination pins

Now field teams have visibility into where coordination issues have been identified. Mitigate risk of rework by flagging where an existing coordination issue lives in the 3D model and where it's located in the 2D drawing. [Learn more.](#)

Better communication with issue commenting

VDC Managers can now comment and add a snapshot to an issue, so detailers can click on the image and navigate directly to a viewpoint in the model. The history of comments and actions, like a change in status and reassignment of an issue, are organized and tracked within the Activity Feed. [Learn more.](#)

FINANCIALS

Track potential revenue throughout the change management process

Our new Change Event Revenue feature allows you to view the full financial effect of a change from beginning to end by tracking its revenue implications alongside the cost impact. [Learn more.](#)

FIELD PRODUCTIVITY

Streamline your time entry approval process

Across all projects, you can now edit, review, and approve employee time entries for the week with the new Company level Timesheets tool. [Learn more.](#)

OTHER UPDATES & ENHANCEMENTS

Conveniently access your Outlook emails and attachments

With our new Microsoft Outlook connector, you can now view all of your Outlook emails from your Procore email tab and view file attachments from your Documents tool. [Learn more.](#)

Additions & updates to the App Marketplace

Our newest integrations include: Foundation, Manpower by Sine, Procore for Outlook, Tools for Trade by Riskcast, Gmail Add-on (Procore Built), Microsoft Project Desktop Sync, and Microsoft Project Online Sync.
