

Asterisk 1.4 Setup Guide

The settings below represent a working Packet8 SIP trunk on a system provisioned with Centos 5.2 and Asterisk 1.4.

extensions.conf

```
TRUNK=Sip/Packet8
```

```
exten => _9XXX.,1,Dial(SIP/${EXTEN:1}@Packet8,,r)
```

[incoming]

```
exten => +14088249474,1,Answer
```

```
exten => +15102484057,1,Answer
```

```
exten => +14088249474,2,Dial(Sip/120)
```

```
exten => +15102484057,2,Dial(Sip/110)
```

sip.conf

```
[Packet8]
```

```
username="Your Packet8 SIP Trunk Login ID"
```

```
type=peer
```

```
secret="Your Packet8 SIP Trunk Password"
```

```
fromuser=15102484057
```

```
context=incoming
```

```
insecure=port,invite
```

```
host=eps1.packet8.net
```

```
dtmfmode=rfc2833
```

```
allow=ulaw
```

```
allow=g729
```
