

Virtual Contact Center Agent & Supervisor Onsite Training

Virtual Contact Center Onsite Training

A professional 8x8 instructor will cover topics that equip Agents and Supervisors to begin using Virtual Contact Center in a live, onsite training session with lecture, demonstration, hands-on exercises, and discussion. The instructor will demonstrate how to manage customer interactions in various contact center channels, including voice, email, and chat. Supervisors will see how queues and agents are managed, and how to generate historical reports.

The customer will receive an electronic copy of class handouts and reference materials.

Training for up to 20 people per session will be delivered at the customer's location (provided the customer's site can accommodate groups of that size). Up to five sessions per day can be scheduled.

Performance Objectives

At the end of training, participants will be able to:

Perform Agent tasks such as:

- Log in and navigate Agent Console
- Set and view Agent and Queue status
- Accept and manage agent interactions (Phone, Chat, Email)

Perform Supervisor tasks such as:

- View traffic and manage contact center queues
- Assign agents to queues
- Generate historical reports

Engagement Process

To arrange onsite training, please contact Training@8x8.com at least two weeks before the desired date (or three weeks, if international travel is required). A signed training plan must be in place to schedule training. Dates are subject to availability.
