MIKE FRANZEN

Implementation Specialist

Agenda

- Review
- What is Scenario Builder
- Review and visualize Scenario results

OUR SOFTWARE

CAPTURE

- What do I have?
- What do I do?
- What is the cost?

ANALYZE

- How are we performing?
- What does our data tell us?
- Why?

PREPARE

- Data-driven decisions
- What-if scenarios
- Budget, resource, condition forecasts

Assets

Know what you have.

- *Inventory*
 - *What are they?*
 - *How many?*
 - *Where are they?*
- *How much do they cost?*
- *What is their condition?*
- **Plan for the future.**

Scenario Builder

What is it and what can it do for me?

- Value
- Why use Scenario Builder?
 - Assist with fiscal year planning
 - Help justify budget requests or proposals
 - Determine the cost of maintaining a certain asset condition level.
 - Identify the cost and impact of future work activities.
 - Gain efficiency by working proactively instead of reactively.
 - Unique – Create ‘What If’ scenarios

LET'S TAKE A LOOK...

Thank You!
