# Release Notes

Please read these notes carefully, because they contain information that is not included in other Kofax Web Capture documentation.

## New Features in 10.4.1

The following features were added to Kofax Web Capture in version 10.4.1:

- Updated Tesseract Engine to version 3.02, which expanded the language set and improved accuracy.
- Updated Kofax libraries.
- Updated the WebDocumentViewer:
  - Removed all usage of `jQuery.browser` in the WebDocumentViewer for future jQuery compatibility. This also prevents Internet Explorer 11 from being detected as a “null” browser.
  - Added the ability to cancel annotation drawing in the WebDocumentViewer. To use, call: `WebAnnotationViewer.annotations.cancelDraw()`
  - Added the config option to the WebDocumentViewer to allow the disabling of flick scrolling. When creating the WebDocumentViewer, use: `"allowflick: false"`
  - Added a config option for the WebDocumentViewer to force the initial loading of pages to the number given. Use: `"pagebuffersize:10"`

---

**Important** This property can dramatically reduce performance if the number is set too high.

---

- Fixed a bug in the WebDocumentViewer that would cause text annotations to remain visible partially after the visible setting was set to true.
- Fixed a bug in the WebDocumentRequestHandler.AnnotationStreamWritten event that assigned annotation data to the document stream.
- Added public cache policy properties in the WebDocumentRequestHandler.

## Resolved Issues in 10.4.1

When you install this version of the product, the following solutions are available for previously reported issues.

- Fixed a bug in the WebDocumentThumbnailer that would give annotations different properties than they did in the main viewer.
- Fixed a bug in the WebAnnotationViewer that would cause default text annotations with a defined font size to show at the incorrect font size in edit mode.
- Fixed a bug that would disallow the dragging and dropping of thumbnails in the WebThumbnailViewer.
- Fixed threading issues with various bar code symbologies.
- Fixed WPF freehand annotation issue with right click.

- Word decoder updates:
  - Fixed issue where images were sometimes not being rendered.
  - Fixed issue with rendering table of contents.
  - Fixed word wrapping issue.
