# About This Release

The Kofax e-Transactions Version 3.0 software and documentation is available from the Kofax Fulfillment Site: <https://delivery.kofax.com/>. A representative from your company registers on this site to download the software and documentation.

If you are an existing Customer, contact your Kofax Practice Manager to discuss and plan for your upgrade. New customers receive email from Sales after completing their agreement with Kofax. The email will contain a serial number to use when registering on the fulfillment site. Registration provides customers with the credentials needed to download the software.

To access the software for this release:

- 1 Log in to the Kofax Fulfillment Site (<https://delivery.kofax.com/>).
- 2 From the your software list, select **Kofax e-Transactions**.
- 3 Under Product Downloads, locate **version 3.0**.

The available packages include all the software, documentation, and license keys for the release.

## Enhancements

### Kofax e-Transaction v3.0 / SupplierExpress v5.0 Integration

When a customer implements both products, additional functionality is now available. Through SupplierExpress configuration, Suppliers and Buyers who also implement Kofax e-Transactions can track the transmission and delivery of invoices sent from Kofax e-Transactions to Kofax Capture. The Supplier and Buyer can check the invoice status from the SupplierExpress web portal *invoice inquiry* view. Additionally, Suppliers who choose to implement Kofax e-Transactions in conjunction with SupplierExpress can download a helpful Buyer-specific, pre-defined configuration file for the Kofax e-Transactions Sender. This file already includes much of the setup and configuration information required to connect Kofax e-Transactions with SupplierExpress.

### Solution Cost Reduction

To reduce the cost and complexity of installing Kofax e-Transactions, Kofax e-Transaction 3.0 only requires Kofax Capture to be installed. Previously, Kofax Transformation Modules were also required. Of course, Kofax e-Transaction 3.0 can operate in an environment that includes both Kofax Capture and Kofax Transformation Modules. This release also adds new functionality that simplifies the field mappings required between Kofax Capture and Kofax e-Transactions.

### Support for TRADACOMS

TRADACOMS is a standard for Electronic Data Interchange (EDI) primarily used in the UK retail sector. TRADACOMS has proven to be durable and the majority of the retail EDI traffic in the UK still uses it. Kofax e-Transactions also supports the EDIFACT (primarily European), and X.12 (primarily North American) EDI formats.

## EDI Classification

Kofax e-Transactions 3.0 also minimizes the steps needed to set up the distribution and delivery of EDI invoices from a Sender site to a Receiver site. EDI invoices destined for any Receiver can now be placed in a single Sender Directory Folder where Kofax e-Transactions can identify the Receiver destination from metadata included within the EDI file. Previously, EDI files destined for a Receiver needed to be placed in a Receiver-specific folder on the Sender before transmission.

## Kofax e-Transactions as a Microsoft Windows Service

Kofax e-Transactions operates on Microsoft Windows operating systems where a Windows Service is a long-running executable that performs specific functions and is designed not to require user intervention. Both the Kofax e-Transactions Sender and Receiver were re-architected to enable each component to operate as a Windows Service. Kofax e-Transaction Sender and Receiver Services now appear in the processes list in the Windows Task Manager.

## Resolved Issues

### Kofax e-Transactions Sender

#### SPR00072478

The EDI import service stops after several seconds when running on Windows 7, 64-bit.

## Known Issues

### Kofax e-Transactions Sender

#### SPR00090391

In Windows Vista, an unexpected message states that the printer could not be verified.

Workaround: Click OK and finish the configuration.

#### SPR00090226

In the Sender Settings Template Wizard, if you separate thousands with an apostrophe ('), you cannot populate the field.

Workaround: Use the Template Designer to populate such numbers.

#### SPR00089662

In the KeT Sender Settings Template Wizard, mapping shifts if you select repeated words as a label.

Workaround: Do not use words that are duplicates in the document when setting up fields.
