Chapter 1

About This Release

The release notes contain late-breaking information about Kofax Analytics for Kapow. Please read this document carefully, as it contains information that is not available in other documentation.

Version Information

This Kofax Analytics for Kapow product is version 1.0.0.

System Requirements

The primary source of information about Kofax Analytics for Kapow requirements and dependencies on other products, including, is the *Cross Product Compatibility Matrix*, which is available on the Kofax website at www.kofax.com. The matrix is updated regularly, and we recommend that you review it carefully to ensure success with your Kofax Analytics for Kapow product.

New Features

This is the first release of the Kofax Analytics for Kapow. Kofax Analytics for Kapow is an extension of Kapow that produces a graphical business intelligence dashboard based on near real-time data collected during the workflow.

Analytics provides information about system performance, KCU Health, CPU and memory utilization, as well as key robot run and schedule run metrics.

Version of Altosoft Insight

Your product package includes Altosoft Insight 5.1.1, which includes a redesigned user interface and other enhancements.

After you install Kofax Analytics for Kapow, a set of Altosoft Insight guides is available from the Documentation folder within your Insight installation.

Note The program folder for Altosoft Insight is labeled as 5.1.0 instead of 5.1.1.

Installation Notes

This section lists important installation and upgrade notes. For Kofax Analytics for Kapow installation instructions, see the Kofax Analytics for Kapow Administrator's Guide.

.NET Framework

When using .NET Framework 4.5.1, be aware of the following:

- If you are installing .NET 4.5.1 and ASP.NET 4.5 on Windows 2012 or Windows 8, ASP.NET may not register correctly with IIS. Use the following command to ensure success:

  ```
  dism /online /enable-feature /featurename:IIS-ASPNET45
  ```

- When installing .NET 4.5.1, be sure to select HTTP Activation, which is not selected by default. Without HTTP Activation, the following error occurs when you attempt to test the connection for the Event Sender:

  ```
  The remote server returned an unexpected response: (405) Method Not Allowed.
  ```

Misleading Log Entry

After installing Altosoft Insight 5.1.1, you may notice the following error in the log file (558976):

```
[1] ERROR
AltoSoft.Insight.DataBaseManager.DatabaseConnectionSettings.BaseSqlConnectionSettings
- Can not find database name in connection string.
```

This installation log entry does not indicate a valid error, and you can safely ignore it.

Chapter 2

Resolved Issues

This is the first release of the Kofax Analytics for Kapow.

Chapter 3

Known Issues

This section describes issues that you may encounter while using Kofax Analytics for Kapow. Workarounds are provided, as applicable.
