# About This Release

The software and documentation is available from the Kofax Fulfillment Site: <https://delivery.kofax.com/>. A representative from your company registers on this site to download the software and documentation.

If you are already a Kofax customer, contact your Kofax Professional Services Regional Manager to discuss and plan your upgrade. New customers receive email from Sales after completing their agreement with Kofax. The email contains a serial number to use when registering on the fulfillment site. Registration provides customers with the credentials needed to download the software.

To access the software for this release:

- 1 Log in to the Kofax Fulfillment Site (<https://delivery.kofax.com/>).
- 2 From the Your Software list, select **Kofax Remote Deposit Capture Smart Mobile Component**.
- 3 Under Product Downloads, locate the desired version.

The available packages include all the software, documentation, and license keys for the release.

## Version Information

The Kofax Remote Deposit Capture 1.3.0 release is identified by build number 1.3.0.0.60.

---

# Resolved Issues

This section describes issues resolved in the following releases.

## Large Images Caused an Error in Check Deposit

There was an issue with large images for Check Deposit that was causing this error:  
Unhandled Exception: System.AccessViolationException: Attempted to read or write protected memory. This is often an indication that other memory is corrupt. This occurred when the image was large and image processing was done on the image. The dimensions of the images were around 3400x1500 with a DPI of 400. (548315)

Affected platforms and/or devices:

- iOS
- Android

---

# Known Issues

This section describes issues that you may encounter while using the Real-Time Transformation Interface. Work-around solutions are provided, as applicable.

## Parameter Names Are Too Long

The following parameters get an `Invalid job initialization parameters` error because the parameter names are too long. (621150)

- `PreferLocalizedExtractionIfLowerConf`
- `PreferLocalizedExtractionIfBlank`
- `PreferCountrySpecificExtraction`

Affected platforms and/or devices:

- iOS
- Android

**Workaround:** Use shorter names as follows:

- `PreferLocalizedExtractionIfLow`
- `PreferLocalizedExtractionIfBla`
- `PreferCountrySpecificExtractio`

## PreferLocalizedExtractionIfLowerConf Parameter Doesn't Work

The `PreferLocalizedExtractionIfLowerConf` parameter is getting an “Invalid job initialization parameters” error. (621123)

Affected platforms and/or devices:

- All

**Workaround:** None

## PreferBooleans not Returning Tri-state Values

When the `PreferBooleans` parameter is set to `False`, the values returned for `IQAFailure` and `Usability Failure` should be tri-stated (YES, NO or NOTDEFINED). However, it returns boolean values. (620608)

Affected platforms and/or devices:

- All

**Workaround:** None

## **IQAFailure fields for CarbonStrip and OutOfFocus Don't Work**

The remote deposit fields `IQAFailure_CarbonStrip` and `IQAFailure_OutOfFocus` have not been implemented. (620567)

Affected platforms and/or devices:

- All

**Workaround:** None
