

Kofax Transformation Modules 6.0 Quiet Mode Installation

Application Note

| | |
|-------------------|---|
| Date | July 25, 2013 |
| Applies To | Kofax Transformation Modules 6.0 |
| Summary | This application note provides the instructions for performing a Kofax Transformation Modules 6.0 quiet installation. |
| Revision | 1.0 |

Kofax Transformation Modules Quiet Mode Installation Overview

The Kofax Transformation Modules Quiet Mode installation allows you to install the product without having to interact with the installation or the system. This automatic installation does not display configuration, progress, feature information, or warning windows. Any error messages that are generated during the installation will still display.

Quiet Mode Installation

Quiet Mode installation can be used to automate the installation of the Kofax Transformation Modules of the user-interactive modules (Validation, Correction, Document Review, and Verification) on target systems. The complete Kofax Transformation Modules functionality is installed by running the setup from the command line with the default Quiet Mode parameters. However, you may customize your installation using the parameters in this document.

If you do not want to perform an interactive installation of Kofax Transformation Modules, you can use Quiet Mode during installation. This automatic installation does not display configuration, progress, feature information, or warning windows, although error messages are still displayed.

You can use Quiet Mode installation to automate the installation. By default, the complete Kofax Transformation Modules functionality is installed by running the setup executable with the Quiet Mode parameter at the command prompt.

NOTES:

- Only one step (instance) of the Validation module is installed. If you want to use multiple Validation steps, you should pass additional parameters to the Kofax Transformation Modules installer. For more information, see the [Parameters](#) list below.
- The Server is installed by default. To configure the Server and Knowledge Base Learning Server services, you need to start the Kofax Transformation - Service Configuration service after the Kofax Transformation Modules installation is complete.

Server Installation

Follow the instructions below to install Kofax Transformation Modules in Quiet Mode.

1. From the Start menu, select Run.
2. Type "cmd" and press Enter.

The command prompt window will display.

3. Change to the folder that contains the Kofax Transformation Modules **Setup.exe** file.

NOTE: If the **setup.exe** file is located on a network drive, remember to map the network drive first.

KTM 6.0 Quite Mode Installation

Application Note

4. Run the setup from the command line using whatever parameters you desire.

For example, by typing the following command you can install only the Validation, Correction, Document Review and Verification modules:

```
setup /quiet NOPROJECTBUILDER=1 NOSERVER=1 STATISTICSEXPORT=0
STATISTICS=0
```

For more information, see the [Parameters](#) list below.

Parameters

Quiet Mode Installation Parameters

| Parameter | Action Description |
|-------------------------------|---|
| <code>/?</code> | Shows the Help window. |
| <code>/quiet</code> | Runs the installer with no user interaction. |
| <code>/log [filename]</code> | Writes the installer log messages to the specified file. |
| <code>/uninstall or /u</code> | Uninstalls the product. |
| <code>property=value</code> | Passes additional parameters to the Windows installer. Please refer to the Property Parameters table below for those additional parameters. |

Property Parameters

| Property Parameter | Action Description |
|---------------------------------|--|
| <code>NOPROJECTBUILDER=1</code> | Disables Kofax Transformation - Project Builder installation. |
| <code>STATISTICS=1</code> | Enables Kofax Transformation Modules - Statistics Viewer installation. |
| <code>NOMODULES=1</code> | Disables installation of all modules in Kofax Transformation Modules. Neither Server, Validation, Correction, Document Review, Verification nor Statistics Release will be installed. |
| <code>NOSERVER=1</code> | Disables Kofax Transformation Modules - Server installation. |
| <code>NOVALIDATION=1</code> | Disables Kofax Transformation Modules - Validation installation. |
| <code>NOCORRECTION=1</code> | Disables Kofax Transformation Modules - Correction installation. |
| <code>NODOCUMENTREVIEW=1</code> | Disables Kofax Transformation Modules - Document Review installation. |
| <code>NOVERIFICATION=1</code> | Disables Kofax Transformation Modules - Verification installation. |
| <code>STATISTICSEXPORT=1</code> | Enables Kofax Transformation Modules - KTM Statistics Export Script installation. |

| Property Parameter | Action Description |
|--------------------|---|
| KADMOS=1 | <p>Selects KADMOS® recognition engine, developed by © re Recognition GmbH as an additional recognition engine that is optimized for handprint characters inside zones for installation.</p> <div style="border: 1px solid black; padding: 5px;"> <p style="text-align: center;">IMPORTANT</p> <p>With the release of KTM 6.0, Kofax is terminating support for the use of KADMOS® in all new installations This recognition engine is not available in later versions of Kofax Transformation Modules. As a result, you should avoid using this engine for any new profiles, and you should convert any existing profiles to another engine.</p> <p>Please refer to the End of Support Announcement for KADMOS® in Kofax Transformation Modules for additional details.</p> </div> |
| VALIDATION2=1 | Selects additional Validation Step 2 for installation. |
| VALIDATION345=1 | Selects additional Validation Step 3 - 5 for installation. |
| ALLADDONS=1 | Selects all available Add-Ons for installation. |
| A2IA=1 | Selects Check and Recursive Recognition, powered by A2iA, as an additional locator optimized for extracting handwritten data from documents and checks for installation. |
| A2IADR=1 | Selects Cursive Page Recognition, powered by A2iA, as an additional OCR engine optimized for extracting handwritten data from documents for installation. |
| iDRS=1 | Selects Arabic OCR, powered by I.R.I.S. Products & Technologies iDRS™, as an additional OCR engine that provides the recognition of Arabic characters for installation. |
| FRADDLANG=1 | Selects ABBYY® FineReader's less commonly used languages for installation. |
| CLIENTINSTALL=1 | Allows the installation of Kofax Capture Custom Modules, such as Server and Validation, without registration and without license ID registration for a client installation, especially if no network is available. |

| Property Parameter | Action Description |
|--|---|
| AUTOSTARTBATCHPROCESSING=1 | Activates the setting "Automatic start of batch processing" of the Server Scheduler Service, by default the setting is deactivated when installing the Server. |
| SCHEDULERUSERNAME=MyMachineName \ServerSchedulerUser1 | Sets the account for the Server Scheduler Service to use the specified user. By default, the account runs as local system account. |
| SCHEDULERUSERPASSWORD=MyPassword2013 | Sets the password for the Server Scheduler Service account. |
| KBSERVICEUSERNAME=MyMachineName \ServerSchedulerUser1 | Sets the account for the Knowledge Base Learning Service to use the specified user. By default, the account runs as local system account. |
| KBSERVICEUSERPASSWORD=MyPassword2013 | Sets the password for the Knowledge Base Learning Service account. |
| NOPREREQUISITES=1 | Using this parameter, the installation does not check the prerequisites and can be used as workaround to install Kofax Transformation Modules when the installation using the main installer fails. |
