About This Release

The release notes give you late-breaking information about Kofax Mortgage Agility version 1.2.0. Please read this document carefully, as it contains information that is not included in other Mortgage Agility documentation.

Version Information

The build number for Kofax Mortgage Agility is 1.2.0.0.1105, which appears in `version.txt`, located in the root folder when you extract `KofaxMortgageAgility-1.2.0` zip.

Product Environment and Installation

For information about the product environment and installation details, see `KofaxMortgageAgilityAdministratorsGuide_EN.pdf`, which is available when you extract `KofaxMortgageAgility-1.2.0` zip.

New Features

This section describes the new features introduced in this version of Kofax Mortgage Agility.

Supported Documents

- Bank statements
- Purchase contracts

Third-Party Integrations

- Sending Documents to LOS (Ellie Mae)
- Kroll Factual Data

Security and Registration

- Lender configurable registration requirements such as loan processor contact, maximum number of borrowers, minimum loan amount, and minimum property value
- Borrower identity verification using data from credit reports

Credit Reports

Order, retrieval, and processing of credit reports from multiple sources is supported.

Additional Enhancements

- Lender configuration and loan processing
- Improved usability

About This Release

- Loan applications for multiple borrowers
- Every borrower allowed to register
- Association of Loan Officer and Processor with loan applications
- Hierarchical business units
- Loan Officer allowed to complete loan applications on behalf of borrower
- Internal workbench (Processor functionality to cross-check documents and request additional documents)

Resolved Issues

This chapter lists previously reported issues that are resolved when you install Kofax Mortgage Agility 1.2.0.

Unable to Create External Resource for Borrower

You could not create an external resource for the borrower. (296660)

Embedded Forms Did Not Display Properly

Display rules on embedded forms were not working properly, and some forms did not display when they were loaded. (299299)

Data Not Pre-Populating on 1003 Form

Data input from the Pre-Qualification form was not pre-populated on the 1003 form or the embedded action forms included on Take Activity forms. (296483)

Resource Password Reset Required

If resources were imported, the passwords were not retained and had to be reset. (295516)

Document Not Displayed in Browser

After you added a web capture control to a form and set the Document ID property to a document in the repository, the document did not display in the browser window. (304338)

Known Issues

This chapter lists issues that you may encounter while working with Kofax Mortgage Agility 1.2.0.

Writing to MISMO Fails Intermittently

After uploading documents for a loan application, the process of writing to MISMO may fail intermittently and produce errors. (593788)

Workaround: Restart the Kofax TotalAgility Core Worker service and Transformation Server, and perform an IIS reset. Then restart the job at the node where it was suspended.

Scrolling Prevented When Mobile Screens Lock

During the mobile sign up process, you may be unable to scroll if the screens become locked. (592389)

Workaround: Click **Done** after making each entry, or refresh the page.

Job Suspended During Bank Statement Submission

During the process of submitting a bank statement, the job becomes suspended; the “processing trigger” for the process map generates an error at the “Raise event” node. (592183)

Borrower Bankruptcy Declaration Always Set to False

During the registration process for a borrower whose credit report indicates a bankruptcy, the job is processed as if the bankruptcy does not exist. (591984)

Activities Suspended at Runtime

Activities become suspended at runtime if the DocumentTypeVersion is hard-coded in the ShouldAndIsClassName business rule. (587847)

Mobile Upload Fails on iPhone 4 or Later

If you attempt to use an iPhone 4, 5 or 6 to upload a form, the process does not work. (587600)

Unable to Scroll Multi-Line Text Box on Phone

While viewing a multi-line text box on a mobile phone, you cannot scroll to bring all of the text into view. The same scrolling process does work successfully on an emulator. (586288)

Login Form Error

During borrower registration, an error may appear on the login form for Mortgage Agility 1.2. (584130)

Workaround: Restart IIS.

Error After Return to Basic Details Screen

If you navigate away from the Basic Details screen, and then return to it, the following error occurs (582586):

```
Failed to set property: calDOB
```

Demo Paystub Fails on Classification Node

If you upload a demo paystub to process a loan application, the following error occurs on the classification node (566347):

```
Execution of activity 07_Paystubs_Classification in job  
<name> was aborted due to the following  
error(s): Object reference not set to an instance of an object.
```

Touch Radio Button Cut Off on Mobile Form

If you include touch radio buttons on a mobile form, the final radio button is always cut off. (565000)

Unable to Add Address to Basic Info Page

When using an iPad to fill out basic information for a borrower, the following error occurs when you attempt to save the address (564732):

```
Service Call Failed: 0 - error
```

Best Fit, Fit to Width Buttons Not Working in Chrome

When the Google Chrome browser is used with a web capture control, the Best Fit and Fit to Width buttons do not work. (561705)

DOB Field Cannot Be Validated for Co-Borrower

The Date of Birth (DOB) field for a co-borrower cannot be validated. (554611)

Process Suspended

During borrower registration, a job is suspended when the “I have a completed 1003” button is selected prior to the following process: Write 1003 to MISMO ExtractedData. (367829)
