# About Kofax Import Connector 2.6.0 technical specifications

Kofax Import Connector is an Add On for Kofax Capture. It is used to ingest electronic documents like files, emails, attachments of emails, faxes etc. into Kofax Capture. The technical specifications in this document are specific to Kofax Import Connector, 2.6.0.

A required amount of memory and disk space is provided. You must meet these requirements to support your Kofax Import Connector system. These requirements specifically list the needs of Kofax Import Connector and do not include any amount of memory or disk space you require for the operating system, environment, or other software that runs on the same machine.

## System architecture

The Kofax Import Connector is an Add On for Kofax Capture. It consists of two components:

1. The **Message Connector** – it is installed independently from Kofax Capture. The Message Connector provides all the interfaces needed, e.g. mail interfaces like EWS, SMTP, POP3 and IMAP, web service interface, fax interface and file interface to ingest electronic documents. Further, the Message Connector performs document conversion as needed
2. The Message Connector connects to Kofax Capture via the so-called **KC Plug-In** which is the second component of the Kofax Import Connector. The KC Plug-In is installed as a plug in on Kofax Capture.

## Product requirements

### Product component

Specification	Description
Hardware	Kofax Import Connector requires approximately 200 MB of hard disk space for the application. Additional space is needed for temporary storage of transferred documents. Maximum storage size supported is 64000 MB.  Other HW requirements are the same as Kofax Capture version used.
Accessibility	n.a.
Browser	Internet Explorer

Specification	Description
	Microsoft Edge Firefox Chrome
<b>Mobile Operating Systems</b>	n.a.
<b>Client Operating Systems</b>	Windows 7 Windows 8.1 Pro/Enterprise (32-bit/64-bit) Windows 10
<b>Server Operating Systems</b>	Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2 Windows Server 2016 Operating systems no longer supported: <ul style="list-style-type: none"> <li>• Windows –Server 2003</li> </ul>
<b>Web Servers/Web Application Servers</b>	n.a.
<b>DBMS</b>	n.a.
<b>Required Third Party Technologies</b>	.NET Framework 4.0 is required for installing and operating Kofax Import Connector. For converting Microsoft Office files, you can use the internal conversion tool included in Kofax Import Connector (KFXConverter), or one of the following: <ul style="list-style-type: none"> <li>• OpenOffice.org (certified version 3.2)</li> <li>• Microsoft Office 2010</li> <li>• Microsoft Office 2013</li> <li>• Microsoft Office 365</li> </ul>
<b>Compatible Third Party Technologies</b>	MS Exchange Server 2007 SP1 MS Exchange Server 2010 MS Exchange Server 2013 MS Exchange Server 2016 RightFax 9.X RightFax 10.X

Specification	Description
	Biscom FAXCOM® Server 5.X Biscom FAXCOM® Server 6.X
<b>Required Kofax Software</b>	One of the following Kofax Capture versions: 9.0 10.0 10.1 10.2
<b>Compatible Kofax Software</b>	KM 6.x KM 7.x KCS 9.1.1 KCS 9.2 KCS 10.0 KCS 10.0.1 KCS 10.1
<b>Languages supported</b>	The following languages are supported for the Message Connector Monitor GUI: <ul style="list-style-type: none"><li>• English, French, German, Italian, Portuguese (Brazilian), Spanish (Castilian)</li><li>• Japanese</li></ul>

End of Life Execution with this release:

The following schedule is planned:

- End of Sale announcement & commencement for Kofax Import Connector 2.4 and prior versions - June 30, 2017.
- End of Support announcement Kofax Import Connector 2.4 and prior versions – June 30, 2017.
- End of support to commence - June 30, 2018.
