About Kofax Analytics for Capture Technical Specifications

Kofax Analytics for Capture™ provides optimized out-of-the-box dashboards for measuring the document processing performance, efficiency and productivity of your capture system. The technical specifications in this document are specific to Kofax Analytics for Capture 2.0.

A required amount of memory and disk space is provided. You must meet these requirements to support your Kofax Analytics for Capture system. These requirements specifically list the needs of Kofax Analytics for Capture and do not include any amount of memory or disk space required for the operating system, environment, or other software that runs on the same machine.

System architecture

Kofax Analytics for Capture includes the following components:

- **Event Sender** – Workflow Agent that runs in Kofax Capture and must be registered with Kofax Capture batch classes to send session data to the Event Listener. Session data is transmitted from Kofax Capture / Kofax Transformation Modules whenever a module is closed (excluding the Export module).
- **Event Listener** – Web service that receives session data from Event Sender (Workflow Agent) when batches are closed. Also performs background processing of transitory data in the staging database before writing to the data database.
- **Kofax Insight** – Platform that provides analytics and process intelligence for the Kofax Analytics for Capture project, named KAFC.
- **KAFC Project** – ZIP file that includes all pre-built views, records, metrics, and roles.

Product requirements

Kofax Analytics for Capture 2.0

Hardware recommendations will vary depending on specifics of deployment scenarios. Refer to the *Kofax Analytics for Capture Administrator's Guide* for details related to deployment scenarios and sizing considerations.

Specification	Description
Minimum Hardware - Insight Server	Production system: 8 CPU + 32 GB RAM QA and Dev: 4 CPU +16 GB RAM
Minimum Hardware - Database Server	8 CPU + 16 GB RAM
Minimum Hardware - Event Listener	4 CPU +16 GB RAM
Minimum Browser Version	Internet Explorer 11, Edge 20, Chrome 45, Firefox 40, iOS Safari 8
Server Operating Systems	<ul style="list-style-type: none"> Windows Server 2016 Windows Server 2012 R2 Foundation, Essentials, Standard, Datacenter Windows Server 2012 Foundation, Essentials, Standard, Datacenter Windows Server 2008 R2 Standard/Enterprise/Datacenter (64-Bit) including all service packs
Web Servers/Web Application Servers	Microsoft IIS 7.0 or higher
DBMS	<ul style="list-style-type: none"> SQL Server 2017 (Express, Standard, Enterprise Editions) SQL Server 2016 (Express, Standard, Business Intelligence, Enterprise Editions) SQL Server 2014 (Express, Standard, Business Intelligence, Enterprise Editions) SQL Server 2012 (Express, Standard, Business Intelligence, Enterprise Editions) SQL Server 2008 and R2 (Express, Standard, Datacenter, Enterprise Editions)

Specification	Description
	<ul style="list-style-type: none"> • Oracle 12c Release 2 (12.2) - Windows, IBM AIX, HP UX, Solaris, and Linux • Oracle 12c Release 1 (12.1) - Windows, IBM AIX, HP UX, Solaris, and Linux • Oracle 11g Release 2 (11.2) - Windows, IBM AIX, HP UX, Solaris, and Linux
<p>Required Third Party Technologies</p>	<ul style="list-style-type: none"> • Microsoft Visual C++ 2010 SP1 Redistributable • Microsoft .NET Framework 4.5.2 or higher
<p>Required Kofax Software (minimum requirements)</p>	<p>No changes from Kofax Analytics for Capture 1.2.1.x</p> <p><u>Kofax Capture</u></p> <ul style="list-style-type: none"> • 9.0.3.13 • 10.0.2.11 • 10.1.1 • 10.2.0.3 • 11.0.0 <p><u>Kofax Transformation Modules</u></p> <ul style="list-style-type: none"> • 5.5.3.6 • 6.0.1.4 • 6.1.0 • 6.2.0
<p>Recommended Kofax Software</p>	<p>The new views in Kofax Analytics for Capture 2.0 which calculate the processing times for each document have the following minimum requirements:</p> <p><u>Kofax Capture</u></p> <ul style="list-style-type: none"> • 10.1.1.10 • 10.2.1 • 11.0.0 <p><u>Kofax Transformation Modules</u></p>

Specification	Description
