# NSI AutoStore - AutoCapture Add-in

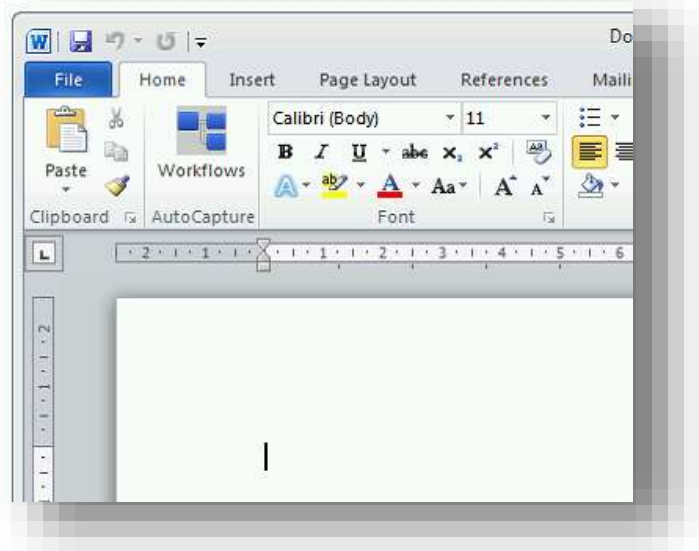

Notable Solutions, Inc.

## NSi AutoStore – AutoCapture Add-in for Office 2007/2010

### *Installation for other users*

Per default the **AutoCapture Office Add-in** is only installed for the user executing the setup file.

Any other users who log on the PC and executes e.g. Word doesn't see the Add-on because of a missing registry key. The missing key has to be inserted for all office components (Word, Excel, Outlook) separately. The reason behind this behavior is to make sure that only the correct users are seeing the AutoCapture Add-in in the necessary office components.

The regarding Registry key is under:

***HKEY\_CURRENT\_USER\Software\Microsoft\Office\Word\Addins\ACOffice.Connect***

***HKEY\_CURRENT\_USER\Software\Microsoft\Office\Excel\Addins\ACOffice.Connect***

***HKEY\_CURRENT\_USER\Software\Microsoft\Office\Outlook\Addins\ACOffice.Connect***

It can be copied directly or via GPO's (Group Policy Objects) to the users which need the add-in.

I.
