Chapter 1

About This Release

The release notes contain late-breaking information about Kofax Analytics for Mobile. Please read this document carefully, as it contains information that is not available in other documentation.

Version Information

This Kofax Analytics for Mobile product is identified by build number 1.0.0.232, which is listed in the About window on the Kofax Analytics for Mobile dashboard.

System Requirements

The primary source of information about Kofax Analytics for Mobile requirements and dependencies on other products is the *Cross Product Compatibility Matrix*, which is available on the Kofax website at www.kofax.com. The matrix is updated regularly, and we recommend that you review it carefully to ensure success with your product.

Chapter 2

Known Issues

This section describes issues that you may encounter while using Kofax Analytics for Mobile. Workarounds are provided, as applicable.

Initial Load of Large Databases May Be Slow

If a large amount of data exists in the Real-Time Transformation Interface Datalog, it may take several minutes to perform the initial data load process. (680065)

Workaround: Depending on the size of your database, you may need to limit the number of transactions loaded at one time. When using the Insight Data Loader, we recommend that you limit each manual data load to no more than 10,000 Real-Time Transformation Interface transactions, which can be accomplished by repeating the Initial Data Load procedure in the *Administrator's Guide*. Each time you repeat the procedure, adjust the date range incrementally until data for the entire date range is loaded.

Alternatively, for data sets larger than 10,000 records you may use the `InsightDataLoader.zip` utility included with Kofax Analytics for Mobile. For instructions please refer to the Loading Historical Data section of the *Kofax Analytics for Mobile Administrator's Guide*.

Error During License Server Test

If you use the Test function on the License Utility configuration window to test the connection for the Custom Kofax License Server, an unhandled exception occurs. (682703)

Workaround: Run the License Utility on a computer where Kofax Capture is not installed.
