# About Kofax Import Connector 2.7 technical specifications

Kofax Import Connector is an Add On for Kofax Capture. It is used to ingest electronic documents like files, emails, attachments of emails, faxes etc. into Kofax Capture. The technical specifications in this document are specific to Kofax Import Connector, 2.7.0.

A required amount of memory and disk space is provided. You must meet these requirements to support your Kofax Import Connector system. These requirements specifically list the needs of Kofax Import Connector and do not include any amount of memory or disk space you require for the operating system, environment, or other software that runs on the same machine.

## System architecture

The Kofax Import Connector is an Add On for Kofax Capture. It consists of two components:

1. The **Message Connector** – it is installed independently from Kofax Capture. The Message Connector provides all the interfaces needed, e.g. mail interfaces like EWS, SMTP, POP3 and IMAP, web service interface, fax interface and file interface to ingest electronic documents. Further, the Message Connector performs document conversion as needed
2. The Message Connector connects to Kofax Capture via the so-called **KC Plug-In** which is the second component of the Kofax Import Connector. The KC Plug-In is installed as a plug in on Kofax Capture.

## Product requirements

### Product component

| Specification                   | Description  |
|---------------------------------|--|
| <b>Hardware</b>                 | Kofax Import Connector requires approximately 200 MB of hard disk space for the application. Additional space is needed for temporary storage of transferred documents. Maximum storage size supported is 64000 MB.<br><br>Other HW requirements are the same as Kofax Capture version used. |
| <b>Accessibility</b>            | n.a.   |
| <b>Browser</b>                  | Internet Explorer<br>Microsoft Edge<br>Firefox<br>Chrome   |
| <b>Mobile Operating Systems</b> | n.a.   |

| Specification                              | Description  |
|--|--|
| <b>Client Operating Systems</b>            | Windows 7<br>Windows 8.1 Pro/Enterprise (32-bit/64-bit)<br>Windows 10  |
