

How do I update reimbursement rates?

When insurance rates change, or differences between payors occur, you may need to edit the standard rates for items. Reimbursement rates in ResMed ReSupply™ are not retroactive. Updated rates are not applied to supply requests marked as shipped.

Note: Your organization's reimbursement rates may differ from the default rate set based on the Medicare standard.

Step-by-step instructions

Update reimbursement rates

1. From the **Administration** menu, select **Reimbursement rates**.
2. From the **Name** column, click the rate you want to update.
3. At the bottom of the page, click **Edit**.
4. Update the name, description or individual rates as required.
Note: You must enter a unique name for the reimbursement rate.
5. Click **Save**.
