UNIVERSITY

# Onsite Training

Need training for your entire team? Bring a Domo University trainer to your business to help accelerate onboarding and adoption.

**LET THE EXPERTS GET YOU THERE FASTER.**

## What is Onsite Training?

Onsite Training means Domo University will send an expert trainer to your company's location to train your teams. This ensures that your unique training requirements are addressed and that your team has the undivided attention of a Domo expert.

## What can we expect with Onsite Training?

After you fill out the Onsite Request Form and arrange an onsite training delivery date with Domo University, your assigned trainer will work with you—via email or phone—to discuss your training goals, review your attendees' roles and needs, and finalize a plan for content you would like your team to learn. You will have every opportunity to choose the curriculum and desired outcomes. Once that's done, the training takes place!

## Which courses does Domo University offer onsite?

- New User: Domo Basics
- New User: Card Building
- New User: Connect and Transform
- Power User: Data Manipulation
- MajorDomo: Managing Domo
- Domo Immersion Training

Note: All courses (with the exception of Domo Immersion Training) last approximately 8 hours and can be mixed and matched to some extent.

## What does Onsite Training cost?

- \$4,500 per day for up to 12 students, plus the trainer's T&E.
