

Fixing Data Issues

Ask: Can you fix the data issue at the source?

YES
NO

NICE!

Make the necessary changes in your system to upload your data correctly into Domo.

NEXT STEPS

Can you fix the data issue in Domo?

Check your data transformations and make sure that everything is working correctly to get you the right data.

- Is there a DataFlow problem?
- Is there a Beast Mode issue?
- Are there a set of filters to apply to get the data you need?

YES
NO

GREAT!

Remember to use the Domo Knowledge Base for how to articles and the DomoU video library.

Would a new data process fix the problem?

Do you have the ability to reconfigure how your data is coming into Domo?

YES
NO

AWESOME.

Hopefully the 500+ Connectors in Domo can help you bring in your data in a more efficient manner to resolve the issue.

Let's talk.

Chat with your Domo CSM to determine a way that your data issue can be resolved.
