# Adaptive Planning 2013.2.2 Release

---

The Adaptive Planning 2013.2.2 Release debuted on December 6, 2013. It consists of an upgrade to allow Adaptive Discovery for Planning and Consolidation to access data outside of planning and consolidation.

Your system will be able to access data from sources other than Adaptive Planning and Adaptive Consolidation. You will be able to visualize and analyze data and KPIs from your operational data (sales, marketing, production, etc.).

You will be able to have operational metrics drive your planning - to adjust your forecasts based on how your business is doing. If you are upgrading from Discovery for Planning and Consolidation, this upgrade provides the following additional features.:

- Data from outside Adaptive Planning/Adaptive Consolidation is shown in a metrics tree parallel to the Adaptive Planning/Adaptive Consolidation accounts tree.
- Notes can be added to data from other sources
- Alerts can be configured on data from other sources.
- What-If analysis is available on data from other sources, provided the user has the Use Analysis Tools permission.
- Show Table will be available for data from other sources. This feature displays a table of the raw data for a selected time period.

Contact your account executive for more information about upgrading to this exciting new feature
