Adaptive Insight 2014.1.1 debuted on April 4, 2014. It consisted of look-and-feel updates to Adaptive Discovery.

New Dials

There are two new dials for Adaptive Discovery: the numeric display dial and the circular meter dial.

Numeric display dials like the one below display a single number (e.g. the current value of an account) and its trend across time. This dial is useful for executive dashboards because it instantly displays a key metric and its trend. You can also add information about the number's variance from a second metric.

Circular meter dials are virtually identical to the familiar circular gauge dial. The only difference between the two is the circular meter's look and feel, which is more modern than that of the circular gauge.

For detailed walkthroughs explaining how to set up a numeric display dial or a circular meter dial, please see the [Adaptive Discovery Guide](#).

New Look

A new look and feel is now available to Adaptive Discovery Customers. This new theme has a new color palette, a new icon library for trends and zones, and other changes. New Discovery customers will get this new theme by default; existing customers can get it by calling or emailing support at support@adaptiveinsights.com.

For a quick look, see the screenshot below.
