Adaptive myDials Release 2012.3

The 2012.3 release encompasses v4.0 and 4.1 myDIALS features.

New Product Features

Multi-calendar support

- Multiple calendar definitions can now be applied to the same data set (e.g. Financial and Gregorian).
- The desired calendar can be selected via the context panel.
- Dials and other components can be pinned to a single calendar.

myDIALS iPhone App

- The app will be available from the Apple App Store in early 2013.
- This dedicated, purpose-built iPhone app connects securely to your myDIALS tenant.
- Data is configurable using mobile table dials which are then assigned to Users or Groups.
- Data can be personalized for different users.
- The user can choose from multiple dials directly from the iPhone app.
- Contains summary, metric, and detail pages including micro charts and notes.
- The app supports multi-dimensional drill-through analysis.

Product Enhancements

Dashboards and Dials

- Enhanced Table Dial visualization
 - Zone and Trend indicators can now be displayed in table dials.
 - Scores can now be applied to each metric in the table using the Zone expressions and a tenant-wide scoring system. The table will also calculate and display the weighted score result with matching flag icon.
 - The table dial is now mobile-capable and can be used to configure the data displayed in the myDIALS iPhone application.
- New Scorecard Layout options that include...
 - Variance, Zone, Trend and Micro Charts for Previous Periods
 - Variance, Zone, Trend and Micro Charts for Consolidated Periods
 - Variance between Previous and Current periods with Zone, Trend and Micro Chart

- Optional setting to use Period-to-Date on Consolidated data
- New aspect ratios for all dials: 5x1 and 6x1
- New Waterfall analysis mode for dials using “Breakdown by Metric”
- Dials displaying “Period-to-Date” now use the period selector for current period.
- Fixed issue with the Period Selector and Home Delay period. The home delay is only applied on initial page load (or Perspective load) and when the “Home” button is selected.

Visual Designer

- Data Settings editor enhancements
 - Split settings into separate Data Settings and Appearance tabs
 - New breakdown data by Value Dimension for multi-series and stacked charts
 - Added ability to pin breakdowns to dimension levels or follow context panel
 - New Marker Size, Shadow and Data Label series appearance settings
- New Scorecard Settings editor
 - Comprehensive set of Layout, Style and Supplementary data settings
- New Table Settings editor
 - Comprehensive set of Layout, Style, Data and Summary settings
- New Calendar editors
 - Time Structure settings and Display Name editor
- Time Settings editor enhancements
 - Time Structure selector
 - Choose between Full Period or Period-to-Date
- Fixed issue with dial series Abbreviation setting. The abbreviation is now set from the metric abbreviation but can be edited.

Administration

- Enhanced connector Agent configuration settings.
- New Cloud Agent management page
 - Management and monitoring of cloud agent ETL jobs
