

**Tim White**  
**Global Head, Government and Intelligence**

Tim White is the Global Head of the Government and Intelligence line of business at YarcData. The majority of his career both in the military and as a civilian has been focused on leading operational missions. As a result of these experiences he became involved in the design and development of analytical processes and systems to support national security missions. Prior to YarcData he spent eight years at General Dynamics and ran several programs including the National Coordination Center at the National Communications System, the Communications-Information Sharing and Analysis Center, and the US-Computer Emergency Readiness Team at the Department of Homeland Security. In these roles he supported assurance of national security systems, continuity of government, and the operations response in defense of the .gov domain and the nation's critical infrastructure. His military career includes 19 years in Army Special Forces, in which he served several roles from operator to commander on multinational, joint and interagency teams. Tim has a bachelor's of arts degree in anthropology and mathematics from the University of Mississippi.
