Know Your Farmer, Know Your Food: “Compass Map” Overview Guide

User Map Description (Version 1)
February 2012
KYF2 Compass Map Goal and Objectives

• The KYF2 Compass Map augments and compliments the Compass Report. The initiative leverages geospatial capabilities to illustrate USDA resources, services, and competencies, and facilitate improved information exchange supporting local food systems. Frequent refresh of map content allows rapid dissemination of best practices, enables search, fosters joint ventures, and so forth, to build collaborative solutions. A key criteria for success is stakeholder community economic growth opportunities and network development, expressed in stories from the field. Stakeholders include partners and participants...

• Examples of KYF2 Partners and Participants:

<table>
<thead>
<tr>
<th>Farmers/Ranchers</th>
<th>Sustainability Advocates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business People</td>
<td>Hunger and Health Advocates</td>
</tr>
<tr>
<td>Citizen Consumers</td>
<td>Rural/Urban Communities</td>
</tr>
<tr>
<td>Academic/Research</td>
<td>Innovators</td>
</tr>
<tr>
<td>Primary/Secondary Schools</td>
<td>Agriculture Entrepreneurs</td>
</tr>
</tbody>
</table>
KYF2 Compass Map Structure and Capabilities

- **Structure of Map Information**: map information is organized as data layers. Double-click on a particular area on the map to zoom to a closer view, or use the slide bar to zoom down to an area of interest.

- **Selecting Data Layers**: “Legend” tab shows Compass Themes related to Compass Report; by clicking on the “Data” tab in the navigation bar on the left, you can choose to display projects by theme, type of recipient, or USDA program.

- **Finding Project Data**: where multiple projects are located in the same location, the map pin, once selected, will pop-up a window that includes a scroll arrow with the number of pages. This arrow is found toward the right in the top of the pop-up window.

- **Zoom to See More**: Some data layers only show up at a state, county, or community level to avoid confusion of too many map pins at a higher level map view. Therefore, you will need to select Data tab item then zoom in closer to see map pins.

- **Additional Data Layers**: you may also display data layers showing the density of seasonal high tunnels, or Farmers Market Nutrition Program funding; or display the outlines of county or congressional district lines.
KYF2 Compass Map Data Layer Considerations

- **Current Data Layers:** the KYF2 Compass and map presents only a portion of USDA resources available for local producers and food businesses. As part of the KYF2 initiative, USDA selected an initial list of 27 programs; the KYF2 Compass and map provide examples of these programs at work. Not every project in these programs is on the map, and there are additional programs that play a significant role that are not included in this list in the first phase of KYF2.

- **Dollar Value Summary:** it may be tempting to add up the dollar amounts displayed on the map to estimate USDA’s overall monetary support for local and regional food systems – but this total would be misleading. For example, to showcase support available for local producers through the Farm Service Agency’s farm loans program, the map includes several case studies in a handful of states. The actual number of local producers that have benefited from FSA backing is much greater, but total monetary support for this sector is not displayed on the map.

- **Updates:** both the map and the KYF2 website will continue to be refreshed over the coming months to showcase additional resources and projects that build jobs, economic opportunity, and community across the country.
The **Legend** tab view matches the Compass Report contents sections... and includes other data layers as well.

**Uses slide bar to scroll down legend**

**Slide bar to zoom in or out of map**

**Provides quick way to focus map on details**

**“Legend” includes Compass Report Themes**

**Example of Map Pin**

Click these with cursor to see pop-up window with data
KYF2 Compass Map Navigation: Data Layers

The Data tab view allows selection of specific data layers to display on the map; many or few.

“Data” includes All Data Layers

Select desired data layers by clicking the box

“Download” Map Data Sets in MS Excel File

Enables source data downloads

“Overview Guide” includes MS Powerpoint Slides

Overview of Map functions and navigation
KYF2 Compass Map Navigation: Project Views

Steps to see Project data:

1. Identify Map Pin
2. Slide bar down through window to see data
3. Use Arrow to scroll through multiple projects

Map Pin colors relate to Compass Report Themes

- Project Pop-up Window
  - (3 data Records)
  - Window provides summary of project and URL links

- Pop-up Window Arrow for Scrolling
  - Click to scroll through multiple data layers

- Pop-up Window Slide bar
  - Slide down to see all data fields
KYF2 Compass Map Navigation: High Tunnels

Know Your Farmer, Know Your Food Compass Map

The map shows many USDA-supported projects and programs related to local and regional food systems for the years 2009-2011. You may move the slide bar to zoom into map areas such as states, counties, communities, etc., and then use your mouse to pop select a map pin symbol to view more information about a project.

To obtain the Glossary descriptions of USDA, 2011 and beyond data as needed, click here, and for more information on using the Compass Map, click here.

High Tunnel Density by Zip Code

Pop-up window summarizes total zip count

Key to High Tunnel distribution by zip code

High Tunnel Density Key
