

Dear EasyCruit Customer

On Tuesday 24 February 2015 we will deploy release 15.2 of EasyCruit. This version will include some improvements of existing functionalities as detailed below, as well as an important security update.

The deployment will start at 17:30 CET and is estimated to take approximately 4 hours. EasyCruit will be unavailable for approximately 2 hours during this time period while we undertake the security updates.

We apologise for the inconvenience this might cause for you and your company.

Solution Number	Customer Number	Issue Description	Solution Description
EC-392		Passwords were able to be included in emails	EasyCruit no longer sends passwords, only a link to create or re-set a password.
EC-383		Unable search by vacancy reference number from the CandidateSearch method	Included the vacancy reference number as part of EasyCruit web services
EC-323	271953	Unable to delete/ remove the personal letter of a candidate	Resolved
EC-373	281714	Some question headers in the back office were right aligned.	Resolved
EC-370	278953	Issue posting to Zett	Updated dropdown menu for Zett xml channel
EC-381	284592	Issue with special characters when performing co-worker import from Excel	UTF8 encoding applied
EC-391		cut-e candidate report not available	Recruiters can choose to send candidates reports on tests automatically

If you have any questions regarding this update please contact EasyCruit Support. Contact information can be found [here](#).

Kind regards

EasyCruit Customer Success Team
