New landing
page

Team-centric resource management to support project teams, hybrid teams, dedicated teams, and any configuration for how your teams are organized

Mobile analytics allows users to easily access interactive Microsoft Power BI content on a mobile or tablet device

Powerful interactive in-app data analysis to help resource managers effectively manage organizational change

New Visio-based modeling features for modeling iterative architectural visualizations

What's in it for me?

Our PPM solution can help us with our agile transformation! I can access all this great data using Power BI on my mobile device, too.

EXECUTIVES

This RMA stuff will help make the day-to-day work that my Resource Managers do so much easier! And Changes, Risks, and Issues are finally in an editable grid! Awesome!

PLANVIEW OWNERS

Rates are easier to manage, edit, and share, all custom attributes can be managed, edited, and exported in one place, and we can now import 50K lines of financial data without timing out!

ADMINISTRATORS

It's great to understand and see what changes have or have not been committed in a live model within Visio.

ARCHITECTS
