

HOW DO I DISTRIBUTE DOMO DATA?

In these options, the data is current at the time of the snapshots sent with all of these options. If you need your data to be consumed with interactive elements, you may want to consider paid options.

FREE

SOCIAL USERS: BUZZ

- Start conversations, then attach files, cards, users, and projects.
- Add new users, favorite messages, add emojis, and more.

PUBLICATION

- Create, download, and share PowerPoint slideshow.
- Make it public by using URL link, or private, by using URL and access code.

SCHEDULED REPORTS

- Schedule reports to be sent via email to users and/or groups at specified intervals.
- Set a report schedule for a card page or for an individual card on a page.
- Send reports to users inside or outside your organization; however, users outside your organization must be in your list of authorized domains. Also, "participant"-level users do not have access to the Report Scheduler.

PLUGINS

- Excel
- PowerPoint
- Word

APPLE APPTORE DOMO TV APP

Download the Domo Apple TV app for free in the Apple TV App Store.

All of these options are interactive—you can drill into the data, select different chart picks, export data and so on.

PAID

DOMO EVERY-WHERE: EMBED

- Public—anyone can use
- Private—need SSO, portal

PUBLICATION GROUPS

- Need SSO and license for every user

PERSONALIZED DATA PERMISSIONS

You may want to consider the use of Personalized Data Permissions. Setting up PDP policies allows you the ability to determine who is seeing what type of data based on elements you set up prior to creating cards or dashboards with those DataSets.

DOMO APIS

- Need Domo license to access APIs
- Connectors to pull data from one Domo instance to another
