

# Domo Mobile | Best Practices

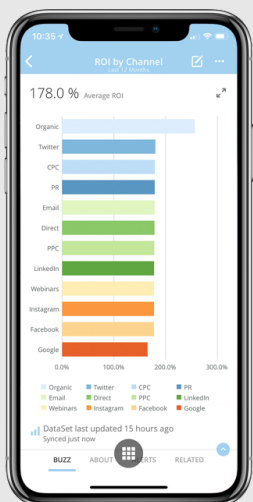

## Home Screen

Add your most important pages to your Home screen by long pressing on any tile.

## Collections

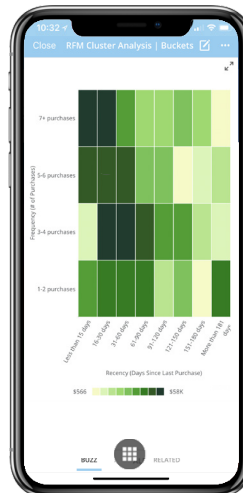

Organize your collections and cards from most to least importance.

## Summary Numbers

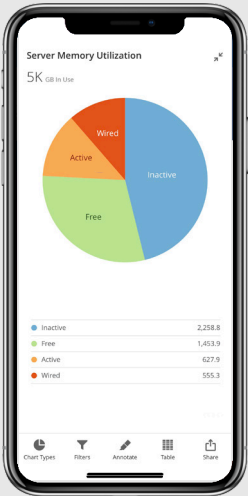

Make sure summary numbers are short and easy to read.

Remember HTML does NOT work in summary numbers for mobile.

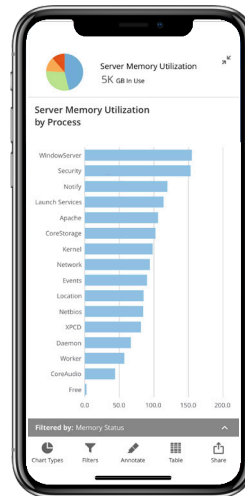

## Cards

Avoid cards that are too granular or busy.

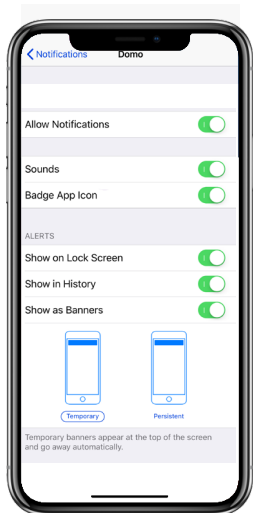

## Chart Types

Tap into interactive mode and rotate your device to view different chart types.

## Leveraging Drill Downs

Double tap on the chart to “drill down” to see filtered views.

## Alerts

Set up Domo alerts on your mobile device.

1. Go to Settings
2. Click on Notifications
3. Select Domo App
4. Choose your preferred alert settings.

## Additional Information

- Long press on your menu button to move it anywhere on the screen.
- Cards created in Analyzer will be responsive in mobile devices.
- Custom apps must be designed for specific screen sizes.
