New Features and Enhancements

Update Decisions via the API

Schools and programs that use systems other than WebAdMIT to evaluate applicants can now update decisions through WebAdMIT's API. This new, prototype functionality is particularly useful for CASs that require participating programs to update final decisions for reporting purposes as it removes the need for admissions staff to individually update decisions in WebAdMIT.

For more information on using our API, refer to developer.webadmit.org.

Resolved Issues

WebAdMIT

The following issues are resolved in WebAdMIT as part of the Sprint 1 release. The codes in parentheses correspond to the identifiers in our issue tracking system.

1. An intermittent data issue that caused the **Documents** panel to render incorrectly was resolved. (WA-4534)
2. Updates were made to workgroup permissions to make them more consistent. (WA-4531)
3. An issue where applicant Suffix data did not render correctly was resolved. (WA-4504)
4. An issue where timestamps did not convert and display consistently when creating lists and exports was resolved. (WA-3976, WA-4383)
5. An issue that caused some applicant's Majors to export and display incorrectly was resolved. Please be sure to review your custom export layout if you are currently exporting applicant Majors from WebAdMIT. (WA-4485)

Applicant Portal

The following issues are resolved in the Applicant Portal as part of the Sprint 1 release. The codes in parentheses correspond to the identifiers in our issue tracking system.

1. An issue that caused applicants to receive an error message upon entering their Social Security Number was resolved. (UNCAS-11624)
2. The **Download Transcript Request** button no longer appears when applicants have only selected a program requiring unofficial transcripts. (UNCAS-11438)
3. The **Suffix** field now validates to ensure only letters are entered in this field. (UNCAS-11259)
